Diagnosis Tester Intelligent Tester

Operator's Manual

EULA Terms

- You have acquired a device ("DEVICE") that includes software licensed by DENSO CORPORATION from an affiliate of Microsoft Corporation ("MS"). Those installed software products of MS origin, as well as associated media, printed materials, and "online" or electronic documentation ("SOFTWARE") are protected by international intellectual property laws and treaties. Manufacturer, MS and its suppliers (including Microsoft Corporation) own the title, copyright, and other intellectual property rights in the SOFTWARE. The SOFTWARE is licensed, not sold. All rights reserved.
- This EULA is valid and grants the end-user rights ONLY if the SOFTWARE is genuine and a genuine Certificate of Authenticity for the SOFTWARE is included. For more information on identifying whether your software is genuine, please see http://www.microsoft.com/piracy/howtotell.
- IF YOU DO NOT AGREE TO THIS END USER LICENSE AGREEMENT ("EULA"), DO NOT USE THE DEVICE OR COPY THE SOFTWARE. INSTEAD, PROMPTLY CONTACT DENSO CORPORATION FOR INSTRUCTIONS ON RETURN OF THE UNUSED DEVICE(S) FOR A REFUND. ANY USE OF THE SOFTWARE, INCLUDING BUT NOT LIMITED TO USE ON THE DEVICE, WILL CONSTITUTE YOUR AGREEMENT TO THIS EULA (OR RATIFICATION OF ANY PREVIOUS CONSENT).
- GRANT OF SOFTWARE LICENSE. This EULA grants you the following license:
 - \succ You may use the SOFTWARE only on the DEVICE.
 - Restricted Functionality. You are licensed to use the SOFTWARE to provide only the limited functionality (specific tasks or processes) for which the DEVICE has been designed and marketed by DENSO CORPORATION. This license specifically prohibits any other use of the software programs or functions, or inclusion of additional software programs or functions that do not directly support the limited functionality on the DEVICE. Notwithstanding the foregoing, you may install or enable on a DEVICE, systems utilities, resource management or similar software solely for the purpose of administration, performance enhancement and/or preventive maintenance of the DEVICE.
 - If you use the DEVICE to access or utilize the services or functionality of Microsoft Windows Server products (such as Microsoft Windows Server 2003), or use the DEVICE to permit workstation or computing devices to access or utilize the services or functionality of Microsoft Windows Server products, you may be required to obtain a Client Access License for the DEVICE and/or each such workstation or computing device. Please refer to the end user license agreement for your Microsoft Windows Server product for additional information.
 - > NOT FAULT TOLERANT. THE SOFTWARE IS NOT FAULT TOLERANT. DENSO CORPORATION HAS INDEPENDENTLY DETERMINED HOW TO USE THE SOFTWARE IN THE DEVICE, AND MS HAS RELIED UPON DENSO CORPORATION TO CONDUCT SUFFICIENT TESTING TO DETERMINE THAT THE SOFTWARE IS SUITABLE FOR SUCH USE.
 - NO WARRANTIES FOR THE SOFTWARE. THE SOFTWARE is provided "AS IS" and with all faults. THE ENTIRE RISK AS TO SATISFACTORY QUALITY, PERFORMANCE, ACCURACY, AND EFFORT (INCLUDING LACK OF NEGLIGENCE) IS WITH YOU. ALSO, THERE IS NO WARRANTY AGAINST INTERFERENCE WITH YOUR ENJOYMENT OF THE SOFTWARE OR AGAINST INFRINGEMENT. IF YOU HAVE RECEIVED ANY WARRANTIES REGARDING THE DEVICE OR THE SOFTWARE, THOSE WARRANTIES DO NOT ORIGINATE FROM, AND ARE NOT BINDING ON, MS.
 - No Liability for Certain Damages. EXCEPT AS PROHIBITED BY LAW, MS SHALL HAVE NO LIABILITY FOR ANY INDIRECT, SPECIAL, CONSEQUENTIAL OR INCIDENTAL DAMAGES ARISING FROM OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THE SOFTWARE. THIS LIMITATION SHALL APPLY EVEN IF ANY REMEDY FAILS OF ITS ESSENTIAL PURPOSE. IN NO EVENT SHALL MS BE LIABLE FOR ANY AMOUNT IN EXCESS OF U.S. TWO HUNDRED FIFTY DOLLARS (U.S.\$250.00).
 - Restricted Uses. The SOFTWARE is not designed or intended for use or resale in hazardous environments requiring fail-safe performance, such as in the operation of nuclear facilities, aircraft navigation or communication systems, air traffic control, or other devices or systems in which a malfunction of the SOFTWARE would result in foreseeable risk of injury or death to the operator of the device or system, or to others.
 - Limitations on Reverse Engineering, Decompilation, and Disassembly. You may not reverse engineer, decompile, or disassemble the SOFTWARE, except and only to the extent that such activity is expressly permitted by applicable law notwithstanding this limitation.

- SOFTWARE as a Component of the DEVICE Transfer. This license may not be shared, transferred to or used concurrently on different computers. The SOFTWARE is licensed with the DEVICE as a single integrated product and may only be used with the DEVICE. If the SOFTWARE is not accompanied by a DEVICE, you may not use the SOFTWARE. You may permanently transfer all of your rights under this EULA only as part of a permanent sale or transfer of the DEVICE, provided you retain no copies of the SOFTWARE. If the SOFTWARE is an upgrade, any transfer must also include all prior versions of the SOFTWARE. This transfer must also include the Certificate of Authenticity label. The transfer may not be an indirect transfer, such as a consignment. Prior to the transfer, the end user receiving the SOFTWARE must agree to all the EULA terms.
- Consent to Use of Data. You agree that MS, Microsoft Corporation and their affiliates may collect and use technical information gathered in any manner as part of product support services related to the SOFTWARE. MS, Microsoft Corporation and their affiliates may use this information solely to improve their products or to provide customized services or technologies to you. MS, Microsoft Corporation and their affiliates may disclose this information to others, but not in a form that personally identifies you.
- Internet Gaming/Update Features. If the SOFTWARE provides, and you choose to utilize, the Internet gaming or update features within the SOFTWARE, it is necessary to use certain computer system, hardware, and software information to implement the features. By using these features, you explicitly authorize MS, Microsoft Corporation and/or their designated agent to use this information solely to improve their products or to provide customized services or technologies to you. MS or Microsoft Corporation may disclose this information to others, but not in a form that personally identifies you.
- Internet-Based Services Components. The SOFTWARE may contain components that enable and facilitate the use of certain Internet-based services. You acknowledge and agree that MS, Microsoft Corporation or their affiliates may automatically check the version of the SOFTWARE and/or its components that you are utilizing and may provide upgrades or supplements to the SOFTWARE that may be automatically downloaded to your DEVICE. Microsoft Corporation or their affiliates do not use these features to collect any information that will be used to identify you or contact you. For more information about these features, please see the privacy statement at <u>http://go.microsoft.com/fwlink/?LinkId=25243.</u>
- Links to Third Party Sites. You may link to third party sites through the use of the SOFTWARE. The third party sites are not under the control of MS or Microsoft Corporation, and MS or Microsoft are not responsible for the contents of any third party sites, any links contained in third party sites, or any changes or updates to third party sites. MS or Microsoft Corporation is not responsible for webcasting or any other form of transmission received from any third party sites. MS or Microsoft Corporation are providing these links to third party sites to you only as a convenience, and the inclusion of any link does not imply an endorsement by MS or Microsoft Corporation of the third party site.
- Notice Regarding Security. To help protect against breaches of security and malicious software, periodically back up your data and system information, use security features such as firewalls, and install and use security updates.
- No Rental/Commercial Hosting. You may not rent, lease, lend or provide commercial hosting services with the SOFTWARE to others.
- Separation of Components. The SOFTWARE is licensed as a single product. Its component parts may not be separated for use on more than one computer.
- Additional Software/Services. This EULA applies to updates, supplements, add-on components, product support services, or Internet-based services components ("Supplemental Components"), of the SOFTWARE that you may obtain from DENSO CORPORATION, MS, Microsoft Corporation or their subsidiaries after the date you obtain your initial copy of the SOFTWARE, unless you accept updated terms or another agreement governs. If other terms are not provided along with such Supplemental Components and the Supplemental Components are provided to you by MS, Microsoft Corporation or their subsidiaries then you will be licensed by such entity under the same terms and conditions of this EULA, except that (i) MS, Microsoft Corporation or their subsidiaries providing the Supplemental Components will be the licensor with respect to such Supplemental Components in lieu of the DENSO CORPORATION for the purposes of the EULA, and (ii) TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, THE SUPPLEMENTAL COMPONENTS AND ANY (IF ANY) SUPPORT SERVICES RELATED TO THE SUPPLEMENTAL COMPONENTS ARE PROVIDED AS IS AND WITH ALL FAULTS. ALL OTHER DISCLAIMERS, LIMITATION OF DAMAGES, AND SPECIAL PROVISIONS PROVIDED BELOW AND/OR OTHERWISE WITH THE SOFTWARE SHALL APPLY TO SUCH SUPPLEMENTAL COMPONENTS. MS, Microsoft Corporation or their subsidiaries reserve the right to discontinue any Internet-based services provided to you or made available to you through the use of the SOFTWARE.
- > Recovery Media. If SOFTWARE is provided by DENSO CORPORATION on separate media and labeled "Recovery Media"

you may use the Recovery Media solely to restore or reinstall the SOFTWARE originally installed on the DEVICE.

- Backup Copy. You may make one (1) backup copy of the SOFTWARE. You may use this backup copy solely for your archival purposes and to reinstall the SOFTWARE on the DEVICE. Except as expressly provided in this EULA or by local law, you may not otherwise make copies of the SOFTWARE, including the printed materials accompanying the SOFTWARE. You may not loan, rent, lend or otherwise transfer the backup copy to another user.
- End User Proof of License. If you acquired the SOFTWARE on a DEVICE, or on a compact disc or other media, a genuine Microsoft "Proof of License"/Certificate of Authenticity label with a genuine copy of the SOFTWARE identifies a licensed copy of the SOFTWARE. To be valid, the label must be affixed to the DEVICE, or appear on DENSO CORPORATION's software packaging. If you receive the label separately other than from DENSO CORPORATION, it is invalid. You should keep the label on the DEVICE or packaging to prove that you are licensed to use the SOFTWARE.
- Product Support. Product support for the SOFTWARE is not provided by MS, Microsoft Corporation, or their affiliates or subsidiaries. For product support, please refer to DENSO CORPORATION support number provided in the documentation for the DEVICE. Should you have any questions concerning this EULA, or if you desire to contact DENSO CORPORATION for any other reason, please refer to the address provided in the documentation for the DEVICE.
- Termination. Without prejudice to any other rights, DENSO CORPORATION may terminate this EULA if you fail to comply with the terms and conditions of this EULA. In such event, you must destroy all copies of the SOFTWARE and all of its component parts.
- EXPORT RESTRICTIONS. You acknowledge that SOFTWARE is subject to U.S. and European Union export jurisdiction. You agree to comply with all applicable international and national laws that apply to the SOFTWARE, including the U.S. Export Administration Regulations, as well as end-user, end-use and destination restrictions issued by U.S. and other governments. For additional information see http://www.microsoft.com/exporting/.

Preface

Thank you for purchasing this Intelligent Tester II.

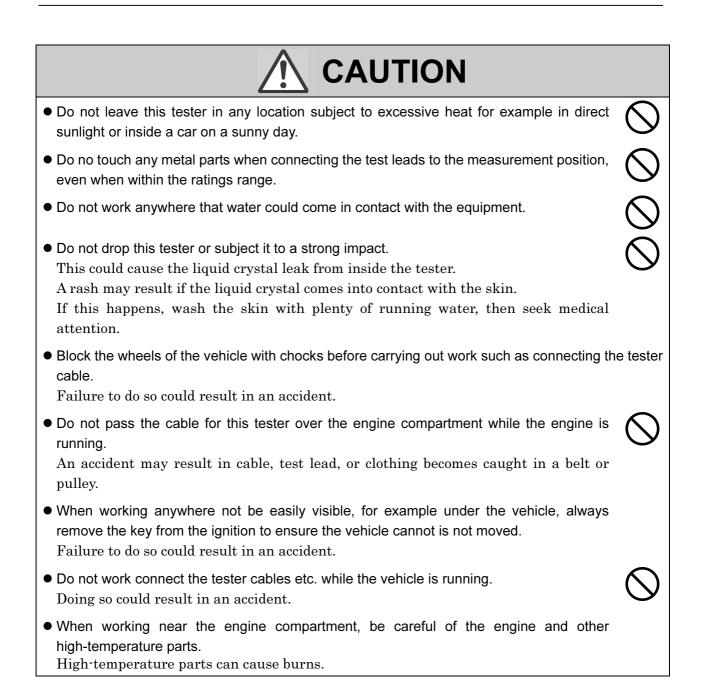

Read this document carefully so that you can use this tester correctly and safely.

For safe usage

This document uses symbols for warnings, cautions, and prohibitions. These symbols and their meanings are as follows. Please make sure you fully understand the meanings of these symbols before reading the rest of this document.

This indicates an item for which incorrect handling can result in a major accident involving death or serious injury.
Indicates an item for which incorrect handling can lead to injury or damage to property. Under certain conditions, more serious consequences may result.
Indicates a prohibited method of handling.

- Always observe the following rules. Failure to do so can result in heat generation, fire, blowout, or electrical shock.
 - Do not use or charge this device with anything other than the AC adapter specifically designed for this tester.
 - Do not disassemble or alter this tester.
 - Do not connect this tester to anything with a voltage exceeding the ratings of this tester.

Trademarks

- Microsoft and Windows [®] CE are trademarks or registered trademarks of the Microsoft Corp. of the United States in the United States and other countries.
- CompactFlashTM is a registered trademark of the SanDisk Corp. of the United States and is licensed to the CFA (CompactFlashTM Association).

Names of the Parts

The names of the Intelligent Tester II parts are as follows.

USB cable connector (for PC connection)

Serial cable connector (RS-232C)

USB cable

connector

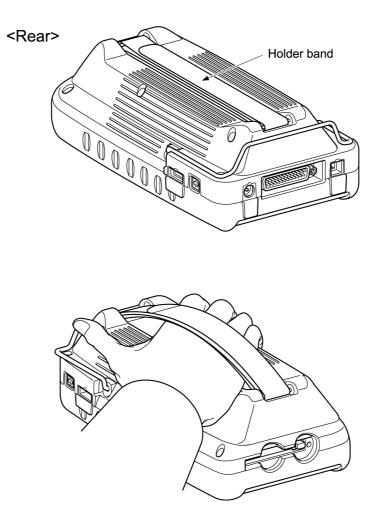

Power switch

(pushed in:ON; out:OFF))

How to Use the Holder Band

Slip your hand between the holder band and the Intelligent Tester II.

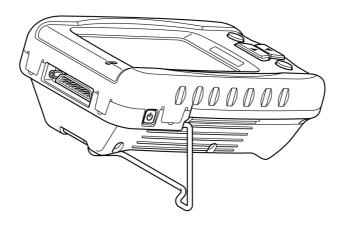

The length of the holder band can be adjusted using the velcro strap. If the holder band is too loose, adjust it so that the Intelligent Tester II is held securely to your hand.

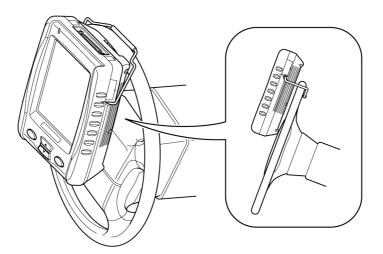

How to Use the Stand

The stand can be pulled out and used as shown below.

To return the stand to its original position, open the stand coupling section horizontally, and then push it back into place.

Raised stand position

Attached to steering wheel

Note

• Be careful when using the stand on an easily damaged surface, for example a wooden steering wheel.

Charging

The main unit of the Intelligent Tester II has a special internal rechargeable battery (lithium ion battery).

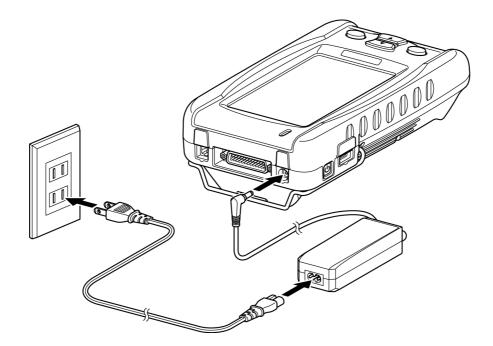

This battery is not charged when the Intelligent Tester II is shipped from the factory, so be sure to charge the battery before using the tester.

Note

- There is no need to turn OFF the power switch on the Intelligent Tester II while charging. The Intelligent Tester II can be charged with the power ON or OFF.
- It takes approximately five hours to fully charge the battery from a completely discharged state, regardless of whether the power switch is ON or OFF.
- **1.** Connect the AC/DC adapter DC plug to the AC/DC adapter connector of the Intelligent Tester II.
- **2.** Plug the AC/DC adapter power plug into an electrical socket.

Charging starts and the battery indicator on the Intelligent Tester II lights up red. Charging is complete when the battery indicator changes from red to green.

- **3.** Disconnect the AC/DC adapter DC plug from the AC/DC adapter connector of the Intelligent Tester II.
- 4. Unplug the AC/DC adapter power plug from the electrical socket.

• Do not charge the Intelligent Tester II battery with any device other than the AC/DC adapter provided.

Use of another adapter may prevent full battery charging, heat and damage the charger used.

- Do not leave the AC/DC adapter plugged into the electrical socket after charging is complete. Dust can build up between the socket and the plug and cause tracking and fire.
- If the battery is charged while outside the usage temperature range, the battery indicator flashes.

Continued charging in this condition could damage the equipment, so discontinue charging.

• Do not connect the AC/DC adapter to the Intelligent Tester II, when using the oscilloscope function.

Note

• The Intelligent Tester II can be connected to the vehicle with the datalink cable to run off the vehicle battery when the tester internal battery is not charged.

In this state, the Intelligent Tester II internal battery will charge using the vehicle power, so take care not to run down the vehicle battery.

• When using the Intelligent Tester II without connecting it to the vehicle (for example when using it as an oscilloscope), monitor the amount of power remaining in the battery and charge it with the AC/DC adapter when it runs low.

The onboard/offboard check screen can be used to check the amount of power remaining in the battery.

Reference: Page 22 Battery Icon (Chapter 2 Basic Operations/Screen Configuration/Title Bar)

- It is normal for the main unit of the Intelligent Tester II to heat up during charging.
- The Intelligent Tester II may be left connected to the AC/DC adapter when the charging is complete.

Internal Battery

When the Intelligent Tester II is not connected to the vehicle, such as with the datalink cable or the external power cable, the Intelligent Tester II is powered by its internal battery.

When the Intelligent Tester II is run on its internal battery, a fully charged battery will last approximately 80 minutes if there is an oscilloscope cartridge or approximately one hour if there is not.

You can check the amount of power remaining in the battery with the onboard/offboard check screen.

Reference: Page 22 Battery Icon (Chapter 2 Basic Operations/Screen Configuration/Title Bar)

The internal battery is a consumable part. When the time that a fully charged battery can be used becomes extremely short, replace the internal battery. Replace the internal battery with a new internal battery.

The Intelligent Tester II uses a specially made internal battery. When it becomes necessary to replace the internal battery, please purchase a replacement battery and install it according to the replacement instructions.

Reference: Page 109 Battery Replacement (Chapter 7 Handling)

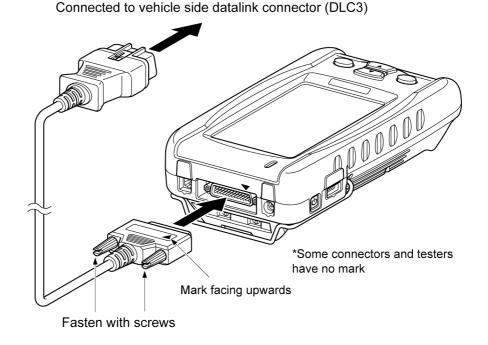

Connection

This section explains how to connect the tester to a vehicle or PC, how to mount a CF card, and how to connect the probes.

Connecting to the Vehicle

Use the datalink cable to connect the Intelligent Tester II to the vehicle.

Check the position of the vehicle-side datalink connector (DLC 3) in the vehicle repair manual.

• When connecting the datalink cable to the Intelligent Tester II and the vehicle side datalink connector (DLC 3), gently insert it gently straight into the connector.

Inserting the cable at a slant can break the connector pins.

 When connecting the data link cable to the Intelligent Tester II, make sure the connector is in the right direction.

(If the data link cable connector has a \blacktriangle mark, it should be facing upwards.)

If you connect it the wrong way up or insert it at an angle, there is a risk of damaging the connector terminal and causing a malfunction of the vehicle or Intelligent Tester II.

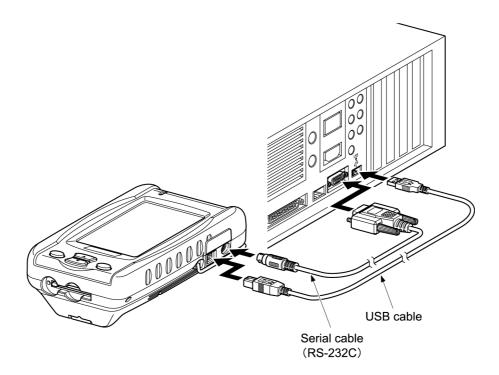

Note

• The carrying case can remain on even when the data link cable is connected to the Intelligent Tester II. It is recommended that you keep them connected all the time.

Connecting to a PC

Use a USB cable or serial cable (RS-232C) to connect the Intelligent Tester II to a PC.

- It is necessary to connect to a PC in the following cases: • When upgrading the Intelligent Tester II software;
 - When rewriting the vehicle computer (ECU) program;
 - When downloading data stored in the Intelligent Tester II into your PC.

• When connecting a USB cable or serial cable (RS-232C) to the Intelligent Tester II and the PC, gently insert the cable straight into the connector.

Inserting the cable at a slant can break the connector pins.

Note

• When downloading data to a PC, use the accessory Intelligent Viewer software. For details on usage methods, see the Intelligent Viewer user's manual.

Inserting a CF Card

The Intelligent Tester II can use CF (CompactFlashTM) cards.

```
• Please use the recommended CF card (DENSO Supply No. 95171-11120). We cannot guarantee proper operation if a different CF card is used.
```

The methods for inserting/removing CF cards are as follows.

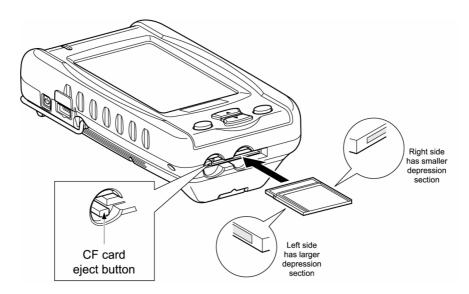

• Inserting a CF card

Gently insert the CF card with the larger indentation (notch) facing to the left side. When the CF card is fully inserted and set correctly, the CF card eject button is click out.

• Removing a CF card

Press the CF card eject button.

The CF card will eject slightly, so gently pull it out the rest of the way.

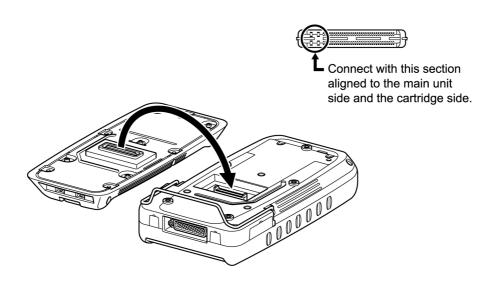

- Do not insert anything but a CF card in this card slot.
- Do not pull out a CF card when power is on.

Connecting the Oscilloscope Cartridge

If you purchased the optional cartridge with the built-in oscilloscope, it is necessary to replace the standard cartridge with this cartridge.

Loosen the five screws securing the standard cartridge and remove the cartridge.

Replace the standard cartridge with the built-in oscilloscope cartridge, and secure it in place by tightening the five screws to a torque of 0.5 ± 0.1 Nm.

- Always make sure the power to the Intelligent Tester II is OFF before replacing the cartridge.
- When connecting the cartridge with the built-in to oscilloscope to the main unit, carefully check the configuration of the connector and gently insert the cartridge straight in.

Inserting the cartridge at a slant can break the connector pins.

• Be careful not to touch the connector section of the main unit or the cartridge with your hands.

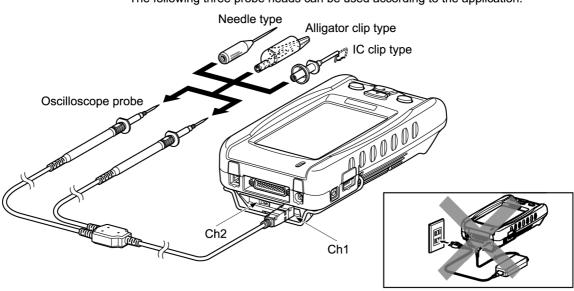

Connecting the Probes

There are two types of probe, the voltage measurement tester probe and the oscilloscope probe.

The oscilloscope probes are an accessory for the oscilloscope.

Connecting the oscilloscope probes

The probe tip is secured to the oscilloscope probe with a screw, regardless of whether the probe is an IC clip type, Needle type, or alligator clip type.

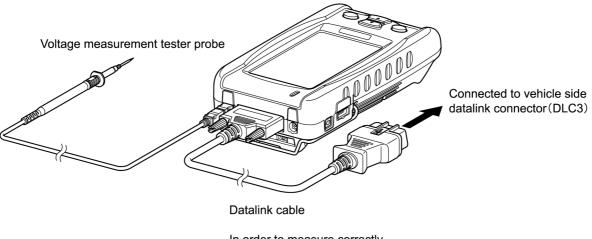

The following three probe heads can be used according to the application.

Connect the oscilloscope probes to Ch1 or Ch2. The probes can be connected to both Ch1 and Ch2.

- When connecting the probe to the Intelligent Tester II, gently insert it straight into the connector. Inserting the probe at a slant can break the connector pins.
- The tip of the probe is sharp, so handle it carefully.
- Do not connect the AC/DC adapter to the Intelligent Tester II, when using the oscilloscope function.

Connecting the voltage measurement tester probe

In order to measure correctly, always connect the datalink cable.

- When connecting the probe to the Intelligent Tester II, gently insert it straight into the connector.
- Inserting the probe at a slant can break the connector pins.
- The tip of the probe is sharp, so handle it carefully.

Note

• In addition to the datalink cable, the optional cigarette lighter cable or battery cable can also be used to ensure correct measurement.

Basic Operations

2 Basic Operations

Starting and Ending

Starting

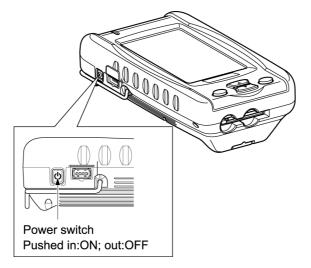

1. Connect the Intelligent Tester II and vehicle side datalink connectors (DLC3) with the datalink cable.

Reference: Page 11 Connecting to the Vehicle (Chapter 1 Before Use/Connecting)

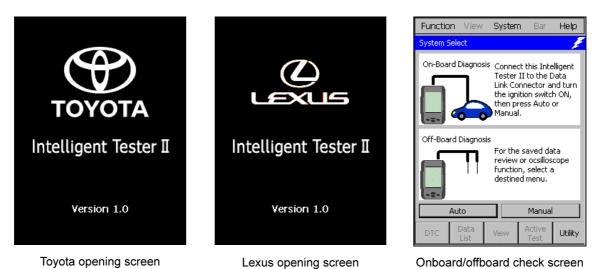

2. Turn the vehicle ignition switch ON.

Note

- Communication with the vehicle computer (ECU) is not possible if the ignition switch is at OFF or ACC. When the Intelligent Tester II is turned ON, always switch the ignition switch ON or start the engine.
- When the Intelligent Tester II is used as measurement function (voltage measurement, oscilloscope), it will work even if the ignition switch is at OFF or ACC.
- If the Intelligent Tester II is connected to the vehicle's diagnostic connector (DLC3) by a datalink cable and supplied with power via an AC/DC adapter or DC power cable for a cigarette lighter socket, the Intelligent Tester II can be operated even with its power switch turned off.
- **3.** Press the Intelligent Tester II power switch to turn the power ON.

 During startup, never switch the Intelligent Tester II power switch OFF until the onboard/offboard check screen is displayed.

After the opening screen is displayed, the display automatically switches to the onboard/offboard check screen.

Note

• There are two opening screens, one for Toyota and one for Lexus. These are selected using the brand select function. The factory setting is the Toyota opening screen.

Reference: Page 34 Brand Selection Function (Chapter 3 Default Settings/Tool Option Functions)

4. When using the Intelligent Tester II as an the OBD function, touch Auto or Manual on the onboard/offboard screen.

The system select screen is displayed.

Note

• To execute the OBD function, choose whether the vehicle is to be selected automatically or manually.

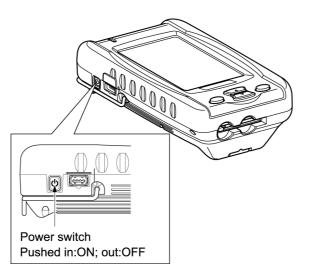

Reference: Page 38 Automatic Vehicle Selection (Chapter 3 Default Settings/Tool Option Functions) Page 39 Manual Vehicle Selection (Chapter 3 Default Settings/Tool Option Functions)

• When using Autoprobe or another measurement function, select that function from the [Utility] menu.

Ending

• If the power to the Intelligent Tester II is switched OFF during an active test, the actuator may remain in the drive state. Always end the active test before switching the power OFF.

- **1.** Turn the vehicle ignition switch OFF.
- 2. Press the Intelligent Tester II power switch to turn the power OFF.

3. Disconnect the datalink cable from the vehicle side datalink connector (DLC3).

When disconnecting the datalink cable from vehicle side datalink connector (DLC 3), gently
pull it straight out of the connector.

Pulling the cable at a slant can break the connector pins.

• When pulling the cable out, hold it by the connector section, and never by the cord section. Pulling on the cord section can break the lines in the cable.

	Scree	n Configu	ration			

The screen configuration for the Intelligent Tester II is as follows.

Note

- The Intelligent Tester II display is a touch panel, so use your fingers to operate it.
- When a menu bar or button item is displayed in gray, this indicates that the item is disabled.

Main Menu Buttons

The main menu buttons are composed of frequently used functions.

These functions can be selected from the menu bars, but the main menu buttons enable these functions to be started at one touch.

♦ ACTIVE KEY

DTC

Starts the DTC check. Freeze frame data can also be checked with a DTC check.

Data List Starts the data list. Snapshots can also be recorded with the data list.

View

Switches the data list display format.

Starts an active test.

Utility

Starts the utility.

Title Bar

The title bar displays the ECU name and function names. Icons displaying the power status and communications status are also shown at the right end.

The icon display at the right end of the title bar varies according to the connection between the Intelligent Tester II and the vehicle computer (ECU).

Battery icon

This icon is displayed when the Intelligent Tester II and the vehicle computer (ECU) are not connected, to show that the Intelligent Tester II is running on its internal battery. The battery icon also functions as an indicator showing the charge level (remaining power) for the internal battery.

Connector icon

This icon is displayed when the Intelligent Tester II and the vehicle computer (ECU) are correctly connected, to show that the Intelligent Tester II is running on vehicle power. The connector icon also functions as an indicator by showing the communications status with its color.

When communication starts, the connector icon changes color according to the communication speed: low speed (green), medium speed (yellow) and high speed (red). The communication speed is determined by the vehicle computer (ECU).

Menu Bar

Five menu titles are displayed in the menu bar. Touching a menu titles displays the list of its functions.

[Function] menu

The [Function] menu is used to select the program for execution. The functions that can be selected from the [Function] menu are as follows.

Help

- When [Help] is touched with [Data List] or [Active Test] selected, an explanation of the item is displayed.
- When [Help] is touched with [Utility] selected, an explanation of the functions is displayed.

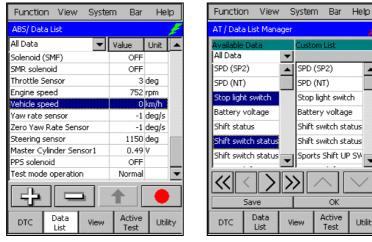

Basic Operations

Display Operation

Touch panel operation

The display for the Intelligent Tester II is a touch panel. Operations on the display are all operated using your fingers.

• To select an item from a list or press a button, briefly tap the item or button with your finger.

Example of screen displaying items in a list

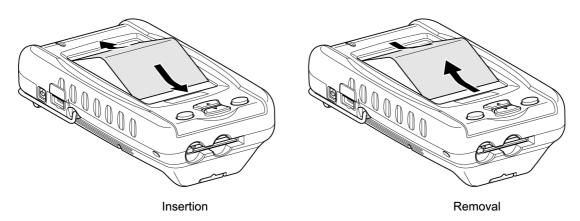

Example of a screen displaying buttons

- To protect the display from scratches, always insert the screen overlay.
- Always operate the touch panel with your fingers. Never use any other object.

Replacing the screen overlay for the display

- When removing the screen overlay, grasp the screen overlay with your fingers and remove.
- Use a soft cloth to wipe the surface of the touch panel clean of any dust etc.
- When inserting the screen overlay, insert it into the gap between the top section and the bottom section of the display.

Scroll bar operation

A scroll bar is displayed on a screen displaying a list. The scroll bar can be used to scroll up and down the list.

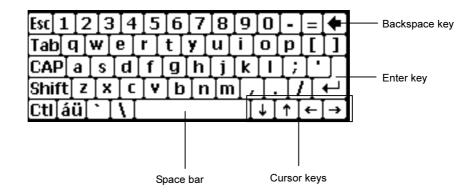

- If you move your finger up/down while touching the scroll bar, the list scrolls up/down.
- Touching \blacktriangle / \checkmark once scrolls the list up/down one line.
- Touching and holding 🔺 / 🔻 scrolls the list up/down continuously.

Example of screen with scroll bar displayed

Software keyboard operation

When it is necessary to input characters on the screen, use the software keyboard.

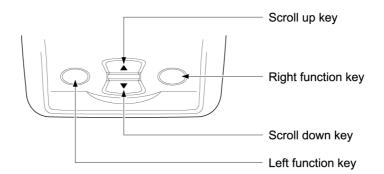

Methods for use are as follows.

- The keyboard can input English alphanumerics.
- To delete a character, use the \leftarrow (backspace) key.
- To switch between uppercase and lowercase English letters, use the Shift key.
- To input accented characters (such as à and Ä) not displayed on the keyboard, touch the <u>áü</u> key. The keyboard display switches to accented characters.

Main Unit Operation

The main unit of the Intelligent Tester II has four hardware keys.

All operations of the Intelligent Tester II can be carried out on the display, but four hardware keys are used for frequently-used functions in order to improve operability.

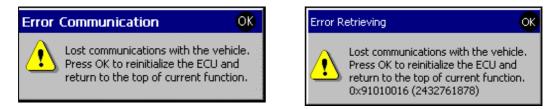

The hardware key functions are as follows.

Hardware key	Functions
Scroll up key	This key is enabled when a list (and a scroll bar) is shown on the display. It scrolls the list up. Pressing this key once scrolls the list up one line; holding the key down scrolls the list up continuously.
Scroll down key	This key is enabled when a list (and a scroll bar) is shown on the display. It scrolls the list down. Pressing this key once scrolls the list down one line; holding this key down scrolls the list down continuously.
Left function key.	Used to return from the screen currently being displayed to the onboard/offboard check screen.
Right function key	 Normally used to return to the system select screen. Used to start/stop measurement during voltage measurement and measurement with the oscilloscope function. When screen image saving is set to "ON", pressing this key saves the screen image. <i>Reference: Page 36 Button Setting Functions</i> (Chapter 3 Default Settings/Tool Option Functions)

In Case of Error

Communication Errors

If a communication error occurs while the Intelligent Tester II is in use, the following error message is displayed.

If a communications error occurs, check the error according to the following procedure.

1. Touch [OK] at the top right of the error message window.

This closes the window and returns to the head screen of the function in which the communication error occurred.

- **2.** Turn the vehicle ignition switch OFF.
- **3.** Turn the Intelligent Tester II power switch OFF.

A connection defect for the datalink cable may be the cause of a communication error. Check the datalink connector (DLC 3) connection at the Intelligent Tester II and vehicle sides.

4. Restart the Intelligent Tester II.

Check if the communication error occurs again.

If so, connect the Intelligent Tester II to another vehicle (of the same model) and check if a communication error occurs with that vehicle.

• If no communication error occurs

There may be a problem with the vehicle. Inspect and repair the vehicle as necessary, in accordance with the vehicle repair manual.

• If a communication error occurs

There may be a problem with the Intelligent Tester II.

System Errors

If a system error occurs while the Intelligent Tester II is in use, an error message dialog box like the following is displayed.

Error Retrieving OK	Error Retrieving OK	Error Retrieving OK
This function cannot be used 0x90010009 (2415984649)	A system error occurred. Please reboot the Tester 0xC0040102 (3221487874)	An error occurred. Please try again 2684683016(A0050308)

If a system error occurs, follow the procedure listed below.

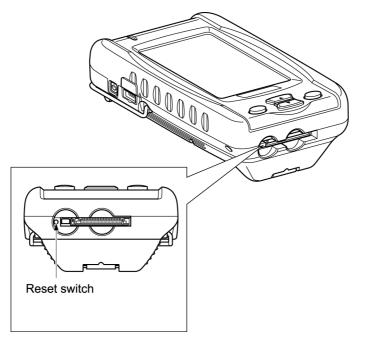

- **1.** Touch OK in the error message dialog box.
- **2.** Turn the Intelligent Tester II power switch OFF.
- 3. Turn the Intelligent Tester II power switch ON to restart the Intelligent Tester II.

If restarting the Intelligent Tester II does not eliminate the system error, write down the error message and ask the service reception staff.

Screen Lock Errors

If there is no response when the touch keys are pressed or the screen locks up when using the Intelligent Tester II, follow the procedure listed below.

- **1.** Turn the Intelligent Tester II power switch OFF.
- 2. Press the reset switch beside the CF card slot.

3. Turn the Intelligent Tester II power switch ON to restart the Intelligent Tester II.

Default Settings

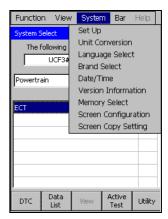

3 Default Settings

Tool Option Function

The default setting tool option function changes the default settings (the factory settings) for the Intelligent Tester II.

The various tool option functions can be selected from the [System] menu on the main menu screen title bar.

This section explains the default setting functions.

[System] menu

Supplementary Functions (Set Up)

The supplementary functions set the level of back light brightness and the display contrast, and turn the buzzer ON/OFF.

Back Light

Adjusts the back light brightness. Sliding the indicator to the left increases the level of brightness.

Note

Making the back light brighter uses more power.
 When the Intelligent Tester II is running on its internal battery, we recommend that the back light be dimmed for as possible.

Display Contrast

Adjusts the display contrast. Sliding the indicator to the left darkens the display.

Buzzer

Select ON/OFF for the buzzer (touch sound).

ACTIVE KEY

OK

Activates the selected settings.

Cancel

Returns to the previous settings.

Touch Panel Compensation Function (Screen Configuration)

The touch panel compensation function compensates for the deviation when a key is operated on the touch panel.

The touch panel compensation procedure is as follows.

- **1.** Touch the + mark displayed in the center of the display. The + mark moves to the top left of the display.
- **2.** Touch the new + mark that has moved. The + mark moves to the bottom left of the display.
- **3.** Touch the new + mark that has moved. The + mark moves to the bottom right of the display.
- **4.** Touch the new + mark that has moved. The + mark moves to the top right of the display.
- **5.** Touch the new + mark that has moved. The screen changes when the + mark disappears from the display.
- 6. Touch any point on the display.

The display changes to the opening screen and touch panel compensation is complete.

 When touching the + mark, always touch for at least one second. The + mark does not move unless touched it for at least one second.

Data Storage Setting Function (Memory Select)

The data storage setting function sets the storage location data. Either internal memory or PC Card 1 can be selected.

- Internal Memory: Internal memory
- PC Card1 : External memory card 1

The storage capacity is displayed after the data storage location has been selected.

ACTIVE KEY

Activates the selected settings.

Cancel

OK

Returns to the previous settings.

Button Setting Functions (Button Configuration)

The button setting functions set short cuts to the left and right function keys on the main unit, and set image storage for the right function key.

- Short cut key settings determine where the screen returns to when the left or right function key on the main unit is pressed.
- The image storage setting switches the image storage function ON/OFF.

The image storage function can store the image being displayed as a file when the right function key on the main unit is pressed. Up to 2 such image files can be stored. The 3rd image file will be written over the oldest file.

The image storage setting returns to the default value (OFF)

when the Intelligent Tester II power goes OFF. This setting is always OFF immediately after the Intelligent Tester II starts up. To enable this function, you must set it to ON after startup.

♦ ACTIVE KEY

OK

Activates the selected settings.

Cancel

Returns to the previous settings.

4 Diagnostics Functions

4 Diagnostics Functions

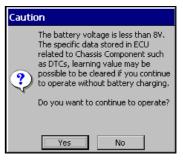

The onboard/offboard check screen is displayed after the opening screen is displayed when the Intelligent Tester II starts up.

When Auto or Manual is touched on the onboard/offboard check screen, the Intelligent Tester II begins communication with the vehicle and check the ECU.

To execute measurement functions such as the oscilloscope that do not require communication with the vehicle, touch $\boxed{\text{Utility}}$.

Onboard/offboard check screen

Warning screen

Note

• If you execute the OBD function when the vehicle battery is 8V or less, the ABS lamp may come on, depending on the vehicle. A warning screen like the one shown on the right will appear. Recharge or replace the battery and execute the OBD function again.

System Selection

It is necessary to select the diagnostics system (the system within the vehicle) when diagnosing the vehicle.

The procedure for selecting the system is as follows.

Note

• The screen on the right may appear before selecting the system procedure. Select the vehicle to be diagnosed.

Vehicle Select	
Select the vehicle.	
w/ Smart Key	
w/o Smart Key	

Vehicle select screen

Automatic Vehicle Selection

1. Touch the list box on the system select screen to select the system category.

When the vehicle information is acquired from the vehicle computer (ECU), the system select screen is displayed.

Select powertrain, chassis, or body as the system category.

A list of the vehicle mounted systems being diagnosed is then displayed.

If vehicle information cannot be acquired, a message screen is displayed.

Note

• If a message screen appears, touch OK to close the window. Touch Manual on the onboard/offboard check screen and select the vehicle to be diagnosed.

Manual Vehicle Selection

1. Enter the data on the vehicle data input screen to specify the vehicle to be diagnosed.

When you touch each data button, a data select screen is displayed. Select the data of the vehicle to be diagnosed from the data select screen. Touch OK and the system select screen is displayed.

Operation from this point is the same as when selecting an automatic vehicle.

Note

 The Intelligent Tester II communicates with the vehicle computer (ECU) even in the case of Manual Vehicle Selection. Connect the Intelligent Tester II with the vehicle before touching Manual.

Time series data list display screen

ACTIVE KEY

Returns the display to the multi freeze frame data display screen.

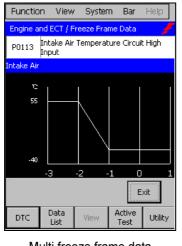

Displays a graph of the data history selected on the time series display screen. This is not valid unless an item has been selected.

Exit

Returns the display to the DTC data display screen.

Multi freeze frame data graph display

When data is selected on the multi freeze frame data display screen or the time series display screen and then is touched, a multi freeze frame data graph screen is displayed.

Multi freeze frame data graph screen

ACTIVE KEY

Exit

Returns the display to the previous screen.

Data List

Vehicle computer (ECU) data can also be monitored numerically or in graph form and snapshots can be recorded.

Data List Display

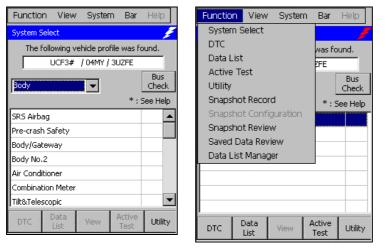

Displays the ECU data for the system selected on the system select screen.

The procedure for displaying the ECU data is as follows.

- **1.** Select the system with the system select screen.
- **2.** Touch the Data List main menu button.

Alternatively, touch [Data List] in the system select screen [Function] menu list.

ECU data is displayed on the data list screen.

Measurement group selection

Data required for diagnosing a specific breakdown can be grouped.

The ECU data belonging to a measurement group can be displayed by selecting that group.

1. From the data list screen list box, select the measurement group.

When you select a measurement group, the ECU data belonging to that group is displayed.

When recording

When saving

Playback/new recording standby

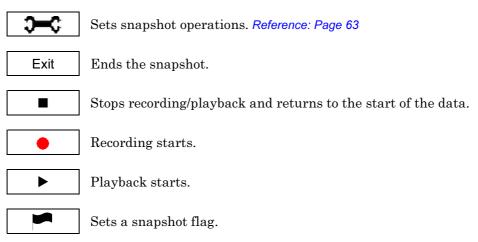

- "Vehicle model_model year_serial number" is set automatically as the file name saved.
- You can set the snapshot flag by touching [

Note

- The snapshot flag stores the point as a mark for the data time elapsed. During playback, you can move quickly to points using the snapshot flags.
- Up to five snapshot flags can be set.

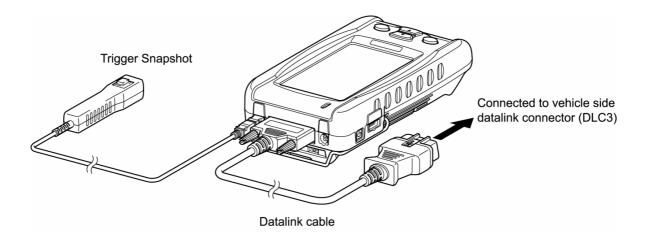

Reference: Page 81 Playback With Snapshot Flag Set (Chapter 5 Saved Data Playback Function/Snapshot Playback)

♦ ACTIVE KEY

How to use the optional accessory Trigger Snapshot

Connecting the Trigger Snapshot

• When connecting the probe to the Intelligent Tester II, gently insert it straight into the connector. Inserting the probe at a slant can break the connector pins.

How to use Trigger Snapshot

- **1.** Press the Trigger Snapshot button while the data list is displayed. Data recording begins.
- **2.** Press the Trigger Snapshot button during data recording. A snapshot flag is set.

Note

Trigger Snapshot can be used to set snapshot flags in a maximum of five places.

Reference: Page 81 Playback With Snapshot Flag Set (Chapter 5 Saved Data Playback Functions/Snapshot Playback)

• Pressing the Trigger Snapshot button after five snapshot flags are set stops data recording.

Snapshot operation settings

Settings can be performed for snapshot operation.

1. Touch **()** on the snapshot screen.

Alternatively, in the data list screen [Function] list, touch [Snapshot Configuration].

The snapshot operation setting screen is displayed.

4 Diagnostics Functions

Active Test

The active test is a function to forcibly drive relays, actuators, solenoids, etc.

If they are driven normally in the active test, it is possible to judge circuits as normal from the ECU to relays, actuators, solenoids, etc.

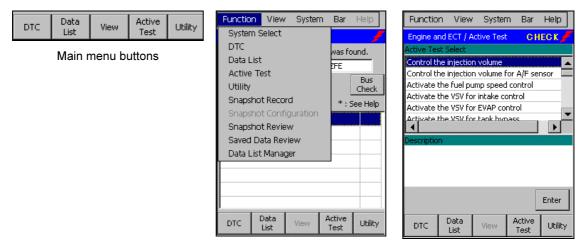

Active Test Item Selection

Selects the active test items.

1. From the main menu buttons, touch <u>Active Test</u>. Alternatively, from the [Function] menu list, touch [Active Test].

The active test item select screen is displayed.

2. On the active test item select screen, select the test items and then touch Enter . The active test starts.

[Function] menu list

Active test item select screen

♦ ACTIVE KEY

Enter

Starts the active test for the selected items. This is not valid unless a test item has been selected.

Active Test Execution

Actuators are driven by the control box.

During an active test, the data list can be displayed simultaneously and measurement groups selected from the list box.

Explanation of ECU Reprogramming Functions

The ECU REPROGRAMMING application allows authorized service professionals to update ECU software without removing the ECU. Please note that there are many security checks performed by the ECU during the reprogramming process, so the specified reprogramming procedure must be followed carefully. *DO NOT attempt ECU reprogramming without proper training from the Toyota service division*.

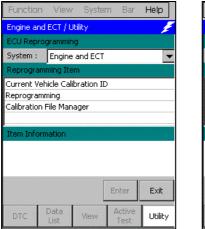

The utility ECU Reprogramming utility functions are four functions for rewriting the ECU program.

- Download Calibration File Downloads programming data from a PC.
- Current Vehicle Calibration ID Acquires the vehicle ECU program ID.
- Reprogramming Updates the ECU program.
- Calibration File Manager Deletes the programming data stored in the Intelligent Tester II.

Select the function for execution from the ECU Reprogramming screen.

"Item Information" displays an explanation of the selected function.

The ECU to be reprogrammed can be selected from the system list box.

ECU Reprogramming screen

Help screen

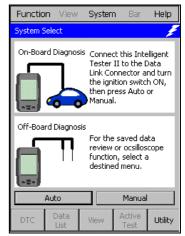

Saved Data Playback Functions

The Intelligent Tester II not only has functions for diagnosing breakdowns in real time, but also has functions that can play back saved data afterwards.

The saved data playback functions do not require the Intelligent Tester II and the vehicle to connect.

The onboard/offboard check screen is displayed after the opening screen when the Intelligent Tester II is started up.

The saved data playback functions are the DTC playback and snapshot playback functions, and they can be started from the [Function] menu.

Onboard/Offboard check screen

DTC Playback

Plays back saved DTC data.

The procedure for playing back DTC data is as follows.

1. From the [Function] menu list, touch [Saved Data Review].

The playback data select screen is displayed and a list of saved DTC data files is displayed.

2. On the playback data select screen, select the DTC data for playback and then touch 🖻 .

When DTC data is selected, file information is displayed in the File Information column. Touching plays back the selected DTC data.

7 Handling

Handling Precautions

Pay attention to the following points when handling the Intelligent Tester II and its accessories.

- Do not leave this tester or any of its accessories exposed to direct sunlight for long periods of time.
- In locations with high humidity, the display back light can deteriorate and the brightness decrease. Use and store in locations with low humidity.
- In locations with high temperatures, the display contrast can become fainter. This phenomenon is normal and is caused by the characteristics of the LCD display. Simply, adjust the contrast to compensate. Also, in low-temperature locations, the display response may be slow. This phenomenon is normal and is caused by the characteristics of the LCD display.
- When cleaning the tester or accessories, never use paint thinner or any other solvent or volatile oil product. This could cause deformation, discoloration, and other such problems as well as loss of function. Wipe gently with a soft cloth dipped in a diluted neutral detergent.
- When the Intelligent Tester II is left unused for a prolonged time, the clock may become inaccurate or stop altogether. If this happens, reset the clock.
- If the internal battery is allowed to remain completely drained for a long time, this will drastically reduce its service life. Even when not using the Intelligent Tester II, charge the internal battery at least once a month.

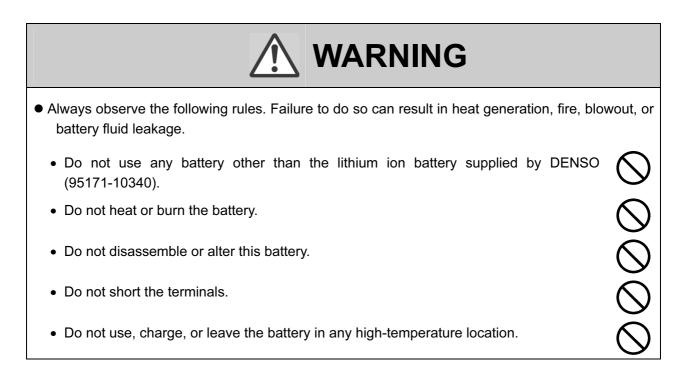

Disposal

When disposing of the Intelligent Tester II or any of its accessories, please do the following.

- The Intelligent Tester II and its accessories contain electronic parts installed using solder that includes lead. In order to prevent damage to the environment resulting from this lead, ask the waste processing company to handle this equipment separate to ordinary non-burnable material.
- The plastic case of the Intelligent Tester II is made of polycarbonate, ABS, and acrylic. Excluding the clear panel (acrylic), the plastic parts have materials abbreviations stamped inside. In order to recycle these compound plastic products, ask the waste processing company to handle the different plastics separately.
- The main unit of the Intelligent Tester II and the oscilloscope cartridge have a lithium ion internal battery. Dispose of used internal batteries in accordance with the regulations of the nation and region.

Battery Replacement

This product uses a lithium ion battery. When replacing the battery, read the cautions below carefully and replace the battery correctly and safely.

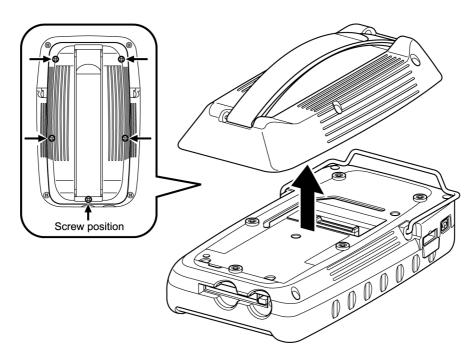

• Correctly dispose of used-up batteries in accordance with legal requirements.

Items to prepare

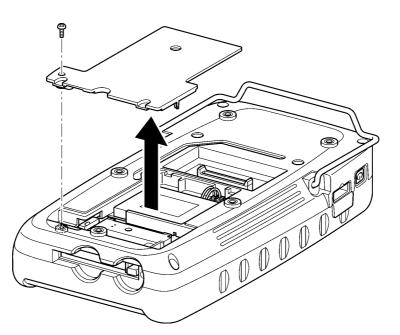

- Philips screwdriver (The standard depends on the region.)
- Replacement battery (DENSO 95171-10340) 1

Replacement procedure

1. Loosen the five screws on the rear of the main unit with a Philips screwdriver and take out the cartridge.

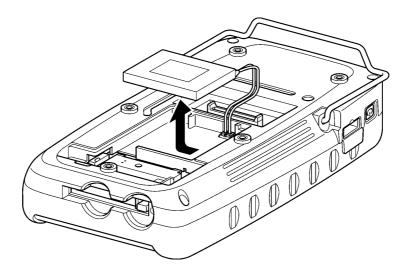

2. Loosen the screw securing the lid of the battery case with a Philips screwdriver and take off the lid.

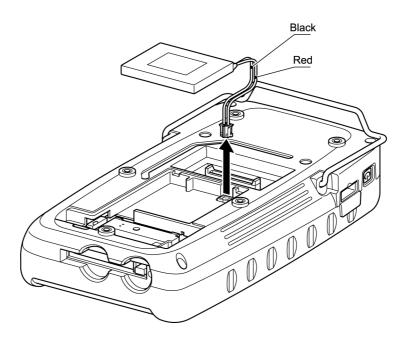

3. Pull out the battery from the battery case.

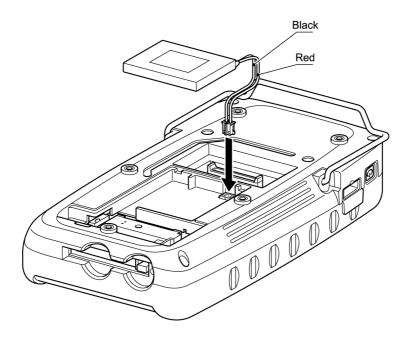

When removing the battery from the battery case, if you disconnect the leads from the connector, protect the tips of the leads with insulating tape to avoid a short.

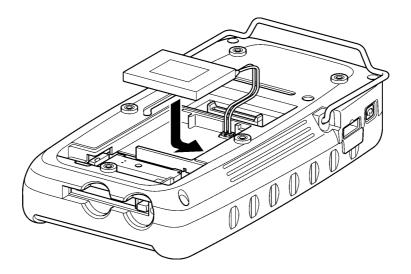

4. Remove the connector.

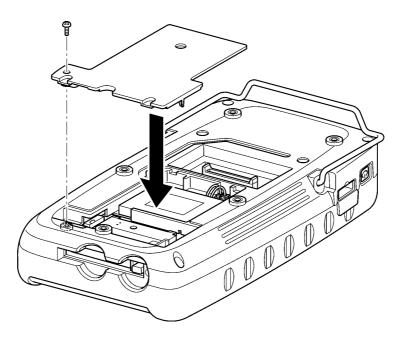

- 7 Handling
 - **5.** Replace the battery with a new one and install the connector. Always connect as in the figure below, so that the red lead is on the right.

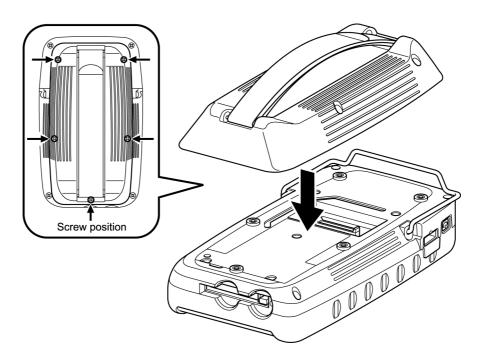

6. Insert the battery all the way into the case so that it fits completely inside the case.

7. Close the lid of the battery case and tighten the screw to a torque of 0.3 ± 0.1 Nm with a Philips screwdriver.

8. Mount the cartridge in the main unit and tighten the five screws to a torque of 0.5 ±0.1 Nm with a Philips screwdriver.

Battery usage time (at normal temperature)	0.8 hours	

After-Service

Intelligent Tester II Warranty and Repair article

I. WARRANTY

- 1.Intelligent Tester II ("Products") is warranted to be free from defects in material and workmanship (Screen Overlay is excluded from this warranty).
- 2. The warranty period for the Products is from the date of shipment to you until the date when one year has passed thereafter.
- 3. This warranty does not cover any part that has been abused, altered, used for a purpose other than that which it was intended, or used in a manner inconsistent with instructions regarding its use, including, but not limited to, the following:
 - Damage due to improper operation or modification of the Products;
 - Damage due to use of the cables and accessory items not originally supplied, or unauthorized peripheral equipment;
 - Damage due to dropping or other severe impact on the Products;
 - Damage due to reverse polarity of 12-volt power and ground;
 - Damage due to exposure to excessive temperatures; or
 - Damage or loss that may occur during shipping.

This warranty excludes failure, breakdown, damage or loss of the Products caused or induced by any faults or defects of software of the Products.

This warranty also excludes all incidental or consequential damage.

II. REPAIR SERVICE

- 1.If there is a problem with the Products, please read the "Operator's Manual" carefully to make sure that the Product is being operated properly.
- 2.If this does not resolve the problem, please fill in the required information on the "Repair Order Sheet"*, including a brief explanation of the problem, the name of the failed Products, and your return address, and send it to a DENSO Overseas Subsidiary (or TOYOTA TSUSHO Japan, if purchased through TOYOTA TSUSHO Japan) by Fax.

Please fill in the "Repair Order Sheet" in English.

*The "Repair Order sheet" is in the Operator's Manual.

3. The DENSO Overseas Subsidiary (or TOYOTA TSUSHO Japan) will send a reply. Please follow the instructions in the reply. If the DENSO Overseas Subsidiary (or TOYOTA TSUSHO Japan) requests the failed parts to be sent back, please send the failed parts with the "Repair Order Sheet"* attached on a freight collect basis.

4.If the problem is determined to be within the scope of warranty as defined in Paragraph I (one) above, it will be repaired or replaced with no charge and the return freight prepaid.

If the problem is determined to be out of the scope of warranty, the DENSO Overseas Subsidiary (or TOYOTA TSUSHO Japan) will inspect the failed Products and reply with a quotation for the repair cost.

After the DENSO Overseas subsidiary (or TOYOTA TSUSHO Japan) receives your request for repair, the item will be repaired for a nominal service charge plus freight cost.

If you have any questions regarding the procedures for warranty and repair service, please contact a DENSO Overseas Subsidiary (or TOYOTA TSUSHO Japan).

Regulatory Information to user

MODEL : DN-IT2-001

1. FCC Regulations

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions :

(1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation

undesired operation.

FCC WARNING : Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: -Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different form that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

2. ICES-003 Regulations

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

3. CE Regulations

CAUTION

-Replace only with the same or equivalent type batteries recommended by the manufacturer.

-Dispose of used batteries according to the manufacturer's instructions.

Manufacturer's Declaration of Conformity in accordance with EC EMC Directive 89/336/EEC

We herewith confirm that under product described below is met the requirements of the EC EMC Directive 89/336/EEC, 92/31/EEC and 93/68/EEC.

Manufacturer Name Address	:	DENSO CORPORATION 1-1 Showa-cho, Kariya-shi, Aichi-ken, 448-8661 Japan
