

INSITE™ 7.6.1 - What's New?

Electronic Service Tools

What's New Topics?

- Installation
- Operating Systems Supported
- New Engines Supported
- New Features Supported
- New ECM Diagnostic Test Supported
- What's New Summary
- INSITE™ Overview

Installation

INSITE™ 7.6.1 installation

- INSITE™ 7.6.1 is available for download through the Cummins Inc. Update Manager
- INSITE™ v7.6.0 or INSITE™ v7.6 SP1 must be installed before installing INSITE™ v7.6.1
- Administrative rights are NOT needed to install INSITE™ v7.6.1
- A new password will not be required if an active subscription to INSITE™ exists

[*Back to What's New Agenda*](#)

Operating Systems

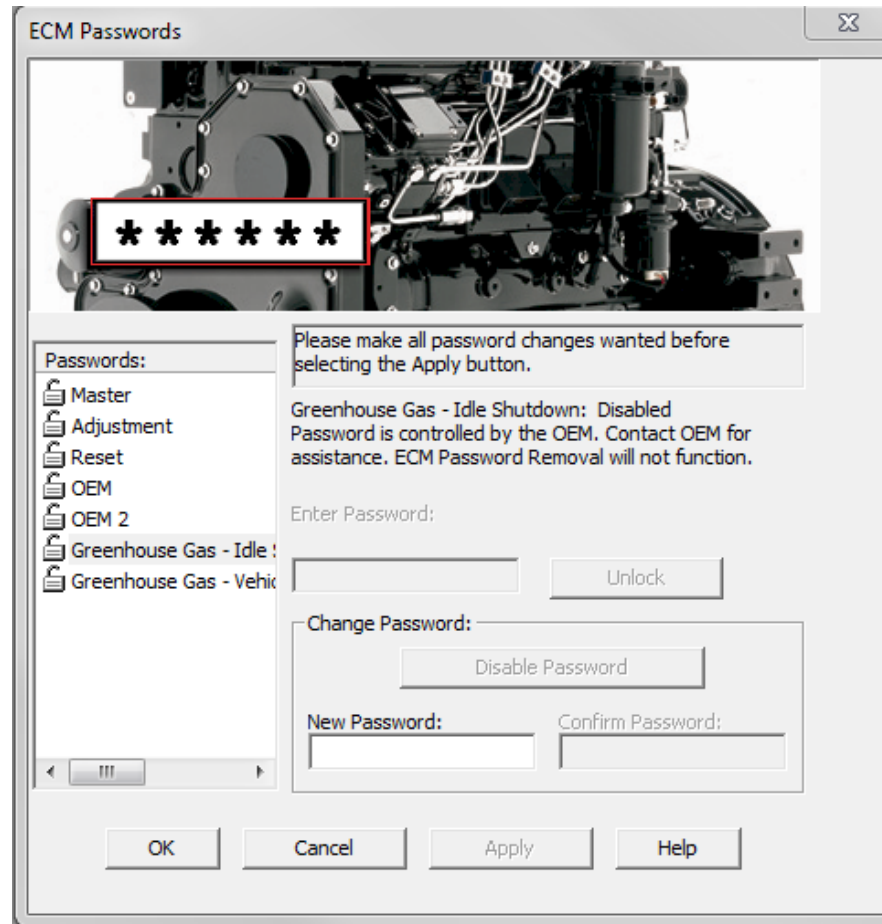

- Supported:
 - Windows® 7, 32-bit and 64-bit
- Not supported:
 - Windows® XP, 32-bit and 64-bit
 - Windows® Vista, 32-bit and 64-bit

[*Back to What's New Agenda*](#)

New/Modified Base Features Supported

- **Greenhouse Gas (GHG) ECM Security**
- Greenhouse Gas - Idle Shutdown and Greenhouse Gas - Vehicle Speed Limiter are two new ECM Security settings designed to allow OEMs to configure engine settings to meet the requirements of the GHG Rules which allows the OEM to claim GHG emissions credits. The OEM will program the features and lock the values with an ECM password.
- These programmed parameters can only be changed when the password has been provided by the OEM.
- The Greenhouse Gas ECM passwords are controlled by the OEM and ECM Password Removal will not function on parameters locked with Greenhouse Gas ECM Security.

Greenhouse Gas (GHG) ECM Security

Greenhouse Gas (GHG) - New in Features and Parameter

Idle Shutdown	Enable	
Idle Shutdown Coolant Temperature Threshold	54	F
Percent Engine Load	20	Percent
Time Before Shutdown	00:10:00	HH:MM:SS
Ambient Temperature Override	Enable	
Greenhouse Gas Idle Shutdown	Enable	
Distance Threshold	46603	mi
Idle Shutdown With Parking Brake Set	Enable	
In PTO	Enable	
Manual Override	Enable	
Shutdown Accessory Relay	Installed	
Warning Period	Enable	

Road Speed Governor	Enable	
Maximum Accelerator Vehicle Speed	65	mph
Maximum Vehicle Speed	75	mph
Road Speed Governor Lower Droop	5	mph
Road Speed Governor Upper Droop	9	mph
Greenhouse Gas Vehicle Speed Limiter	Enable	
Distance Threshold	62	mi
Maximum Vehicle Speed	75	mph
Override Distance	1243	mi
Reset Interval	435	mi

New Features Supported

- **Note:** New features and monitors will be displayed by INSITE only if they are supported by the calibration.
- **Accelerator Brake Override**
 - This feature provides the ability to limit the accelerator when both the accelerator and brake pedals are pressed for a period of time. This will allow the operator to move the vehicle to a safe position when conditions such as a stuck accelerator pedal or lever occurs.
- **Battery Power Required Lamp**
 - This feature informs the user when it is safe to remove power after key off. This allows all data to be saved to the flash, perform any Key OFF tasks and for the ECM to safely shutdown. Once the lamp goes OFF, it indicates it is safe to remove power.
- **Coolant Level Sensor**
 - This feature provides the necessary parameters to interface with the Engine Coolant Level Sensor 2.

[Back to What's New Agenda](#)

New Features Supported

- **Electric Fuel Lift Pump**

- This feature provides the ability to configure the Electric Fuel Lift Pump.

- **Fuel Level Sensor 2**

- This feature provides the capability to enable the Fuel Level Sensor 2.

- **Fuel Level Sensor 2 Multiplexing**

- This feature provides customers to configure the ECM to accept the Fuel Level Sensor 2 input via the datalink instead of a physical ECM input.

[Back to What's New Agenda](#)

New Features Supported

■ Greenhouse Gas Idle Shutdown

- This feature provides the ability for the OEM's to enable Idle Shutdown as well as define the distance the vehicle must travel before Idle Shutdown can be modified. To change these settings, the OEM must be contacted for the Greenhouse Gas - Idle Shutdown password.

■ Greenhouse Gas Vehicle Speed Limiter

- This feature provides the ability for the OEM's to set the Maximum Vehicle Speed and driver initiated overrides as well as define the distance the vehicle must travel before these settings can be modified. To change these settings, the OEM must be contacted for the Greenhouse Gas - Vehicle Speed Limiter password.

■ Idle Shutdown Warning Period

- This feature will set up the amount of time the warning lamp will blink before the engine is shutdown while idling.

■ Step Size Adjustment

- This feature provides the ability to configure the amount of increase or decrease in step size when adjusting the Power Take Off speed.

New ECM Diagnostic Test Supported

- **Aftertreatment SCR Performance Test**

- The Aftertreatment SCR Performance test can be used to monitor the status of the Aftertreatment SCR Catalyst Outlet NOx Sensor and the Aftertreatment SCR Catalyst. This test also starts the Aftertreatment Diesel Particulate Filter Regeneration.

New Monitors Supported

- Aftertreatment Combined Soot Load Estimate
- Aftertreatment Diesel Exhaust Fluid Dosing State
- Aftertreatment Diesel Exhaust Fluid Line Heater 3 Status
- Aftertreatment Diesel Oxidation Catalyst Intake Temperature
- Aftertreatment Diesel Particulate Filter Intake Temperature
- Aftertreatment Diesel Particulate Filter Outlet Temperature
- Aftertreatment Differential Pressure Soot Load Estimate
- Aftertreatment Model Based Soot Load Estimate
- Air Conditioner Pressure
- Air Conditioner Status
- Air Conditioning Pressure Sensor Voltage
- Alternator Voltage
- Clutch Interlock Park/Neutral Switch
- Dual Valve Fuel Control Mode
- ECM Key Off Time
- EGR Cooler Bypass Valve Position
- EGR Flow Ratio
- EGR Valve Flow
- EGR Valve Position Commanded
- EGR Valve Position Fault
- Engine Operating State
- Engine Torque Mode
- Failed Handshake Count
- Fuel Level Sensor 2
- Fuel Rail Pressure Feedback
- High Speed Governor Breakpoint Speed
- High Temperature Coolant Intake Temperature
- High Temperature Coolant Intake Temperature Sensor Voltage
- Interstage Pressure
- Interstage Pressure Sensor Voltage
- Low Speed Governor Reference Speed
- Mass Air Flow Frequency
- Oil Pressure Switch Status
- Open Modular Diaphragm Valve Engine Run Time
- Pressure Control Valve Current Commanded
- Pressure Control Valve Current Feedback
- Primary Accelerator Pedal or Lever Position
- Secondary Accelerator Pedal or Lever Position
- SKIM Communication Status
- SKIM Handshake Timer
- SKIM Key Received Count
- SKIM Reset Status
- SKIM Status
- Stationary Pumping Mode
- Throttle Differential Pressure
- Throttle Differential Pressure Sensor Signal Voltage
- Total Confirmed Modular Diaphragm Valve Pop-Offs
- Voltage Regulator Driver Duty Cycle
- Voltage Regulator Setpoint
- Volume Control Current Commanded
- Volume Control Current Feedback
- Wastegate/VGT Actuator Position Commanded
- Water In Fuel Error - Distance After Error
- Water In Fuel Error - Distance During Error
- Water In Fuel Error - Distance From Error Set To Error Cleared
- Water In Fuel Error - Number of Errors
- Water In Fuel Error - Total Distance At Last Error

1/28/2013

What's New Summary

- This has been an overview of INSITE™
- For further training on INSITE, please refer to the INSITE™ Virtual College CD, P/N **4091839**

the Table of Content.

INSITE™ Calibration Selection

Electronic Service Tools

Calibration Selection

Programmable Datalink Device

- The Calibration Selection has been redesigned to include a separate section for Programmable Datalink Device (PDD) Calibrations such as the Aftertreatment Device or Turbocharger. This will allow users to bypass connecting to the ECM and download directly to a PDD.

Back to What's New Agenda

The screenshot displays the INSITE 7.6.0.267 software interface. On the left is a vertical sidebar with various tool icons and labels: Connect to ECM, Fault Codes, Data Monitor/Logger, ECM Diagnostic Tests, Advanced ECM Data, Features and Parameters, Calibration Selection, Work Orders, Trip Information, Audit Trail, Inquire Data Extraction, and OBD Monitors. The main window is divided into two panes. The left pane shows a file tree under 'My Computer' with the following structure:

- Windows7 (C:\)
- Calibration Workspace (C:\Intelect\INSITE)
- Data (D:\)
 - October 2012
 - Automotive
 - Industrial
 - 480C-E
 - Celect Plus Industrial
 - CENSE
 - Centinel
 - CENTRY
 - PIM
 - QSB 6.7/QSL 9 CM2250 Komatsu
 - QSB3.3 - CM2150C/D
 - QSB5.9/44, 5.9/30, 4.5/30, 3.5/30
 - QSC8.3 - CM850

Calibration Selection

Calibration Selection: Authorization Passwords

Calibration Authorization Password is not required:

- Calibrating an ECM to a newer or older ECM Code revision
- Superseding ECM Codes
- Calibrating a Foot Printed ECM

Calibration Authorization Password is required:

- Calibrating a ROM booted ECM
- Changing to a different ECM Code

Authorization can be done by using:

- Fleet Count
- Calibration Authorization Password

– These are obtained from local distributors

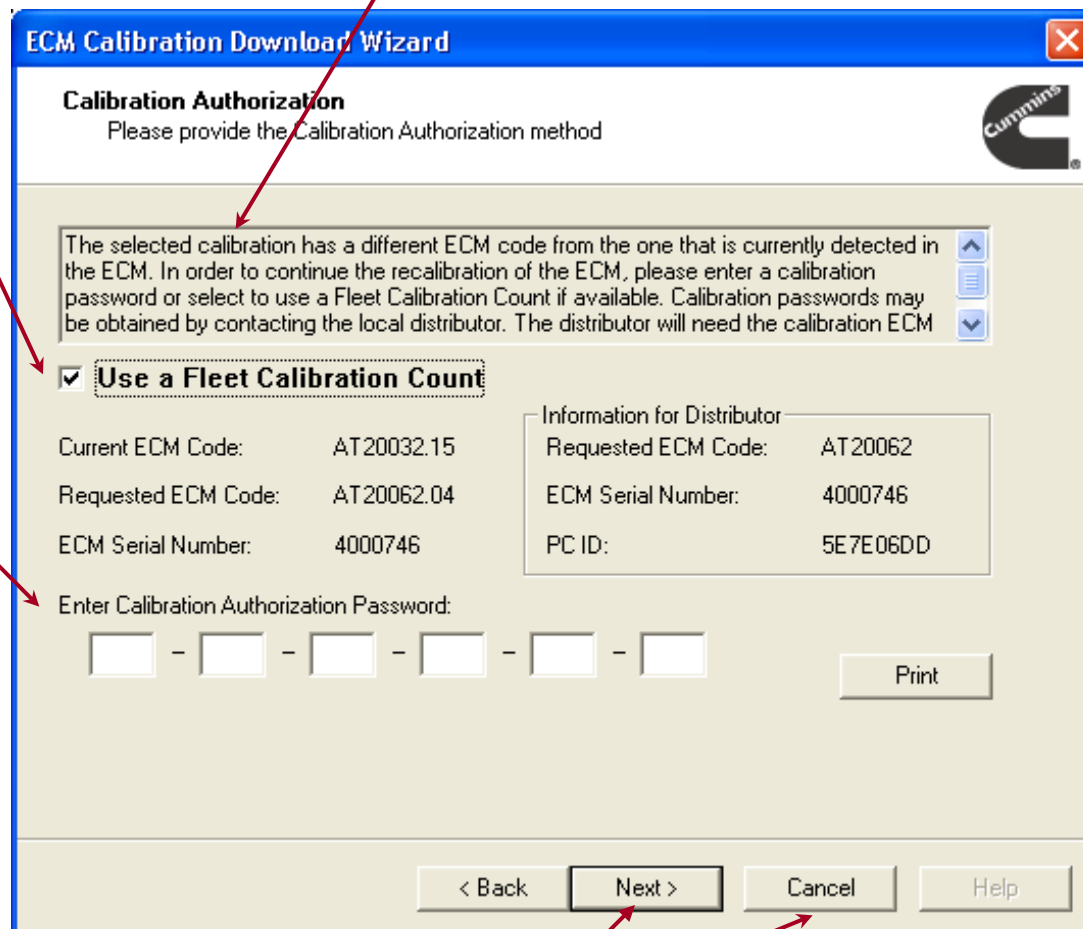

*If Fleet Count
available,
Check to use
Fleet Count*

OR

*Use single
Calibration
Authorization
Password*

Information given

The screenshot shows the 'ECM Calibration Download Wizard' window. The title bar is blue with the text 'ECM Calibration Download Wizard' and a close button. The main window has a light beige background. At the top, it says 'Calibration Authorization' and 'Please provide the Calibration Authorization method'. On the right is the Cummins logo. A text box contains instructions: 'The selected calibration has a different ECM code from the one that is currently detected in the ECM. In order to continue the recalibration of the ECM, please enter a calibration password or select to use a Fleet Calibration Count if available. Calibration passwords may be obtained by contacting the local distributor. The distributor will need the calibration ECM'. Below this is a checkbox labeled 'Use a Fleet Calibration Count' which is checked. To the right of this is a box titled 'Information for Distributor' containing: 'Requested ECM Code: AT20062', 'ECM Serial Number: 4000746', and 'PC ID: 5E7E06DD'. Below the checkbox are labels for 'Current ECM Code: AT20032.15', 'Requested ECM Code: AT20062.04', and 'ECM Serial Number: 4000746'. At the bottom, there is a field 'Enter Calibration Authorization Password:' followed by six input boxes separated by dashes. A 'Print' button is to the right of the password field. At the very bottom are four buttons: '< Back', 'Next >', 'Cancel', and 'Help'.

ECM Calibration Download Wizard

Calibration Authorization
Please provide the Calibration Authorization method

The selected calibration has a different ECM code from the one that is currently detected in the ECM. In order to continue the recalibration of the ECM, please enter a calibration password or select to use a Fleet Calibration Count if available. Calibration passwords may be obtained by contacting the local distributor. The distributor will need the calibration ECM

☒ **Use a Fleet Calibration Count**

The screenshot shows the 'ECM Calibration Download Wizard' window, specifically the 'System ID and Dataplate' step. The window title is 'ECM Calibration Download Wizard' with a close button in the top right. Below the title bar, the section is 'System ID and Dataplate' with the instruction 'Verify and/or modify the System ID and Dataplate information'. The Cummins logo is in the top right corner. The main area contains a table of parameters:

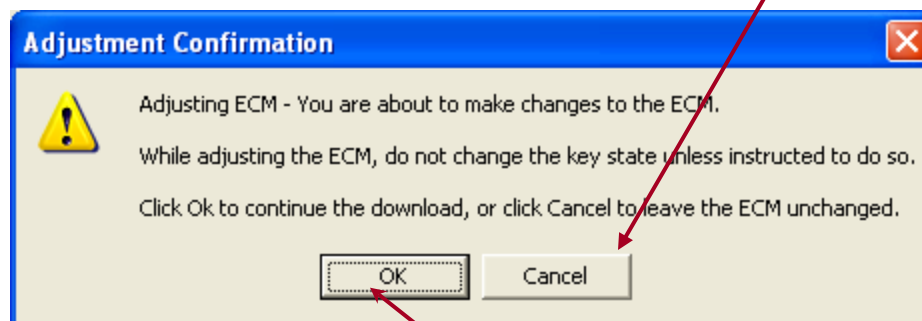

Parameter	Value
Fuel Code	0XM6400
Governed Speed	2100
Peak Torque at RPM	1143
Peak Torque RPM	1200
Vehicle/DEM Information	
DEM Name	
DEM Vehicle or Equipment Model	
Vehicle Identification Number (VIN) or Equipment Serial Number	00000000000000000000
Vehicle or Equipment Year	2008

Below the table, there is a checkbox labeled 'Save / Restore Adjustable Parameters' which is checked. To the right of this checkbox is a button labeled 'Restore Original Values'. At the bottom of the window are four buttons: '< Back', 'Next >', 'Cancel', and 'Help'. Red arrows point from the text boxes to the 'Save / Restore Adjustable Parameters' checkbox, the 'Restore Original Values' button, the 'Next >' button, and the 'Cancel' button.

Programmable Datalink Device (PDD) Calibration Download Capability

- INSITE provides the capability to download a calibration to a PDD using any RP1210A adapter
- This capability is found in the Calibration Selection
- The latest INLINE 4/5 and INLINE 6 Drivers Firmware are needed to support the calibration download

Programmable Datalink Device (PDD) Calibration Download

The screenshot displays the INSITE 7.6.0.267 software interface. On the left is a vertical sidebar with icons and labels for various functions: Connect to ECM, Fault Codes, Data Monitor/Logger, ECM Diagnostic Tests, Advanced ECM Data, Features and Parameters, Calibration Selection (highlighted), Work Orders, Trip Information, Audit Trail, Inquire Data Extraction, and OBD Monitors. The main window is titled 'Datalink Selection' and contains a 'Datalink Adapter Vendor' dropdown menu. This menu is open, showing a list of vendors: PEAK-Sytem Technik GmbH, Cummins, Inc., Cummins Inc. INLINE6, and Cummins Inc. J2534 Inline6. A red arrow points from a text box to the dropdown arrow. Below the vendor list are fields for 'Select Database Location' and 'Select Product'. At the bottom of the main window is a 'Refresh' button. The status bar at the very bottom shows 'No ECM Connected' and the date '1/28/2013'.

Calibration Transfer Summary shows the calibration download status

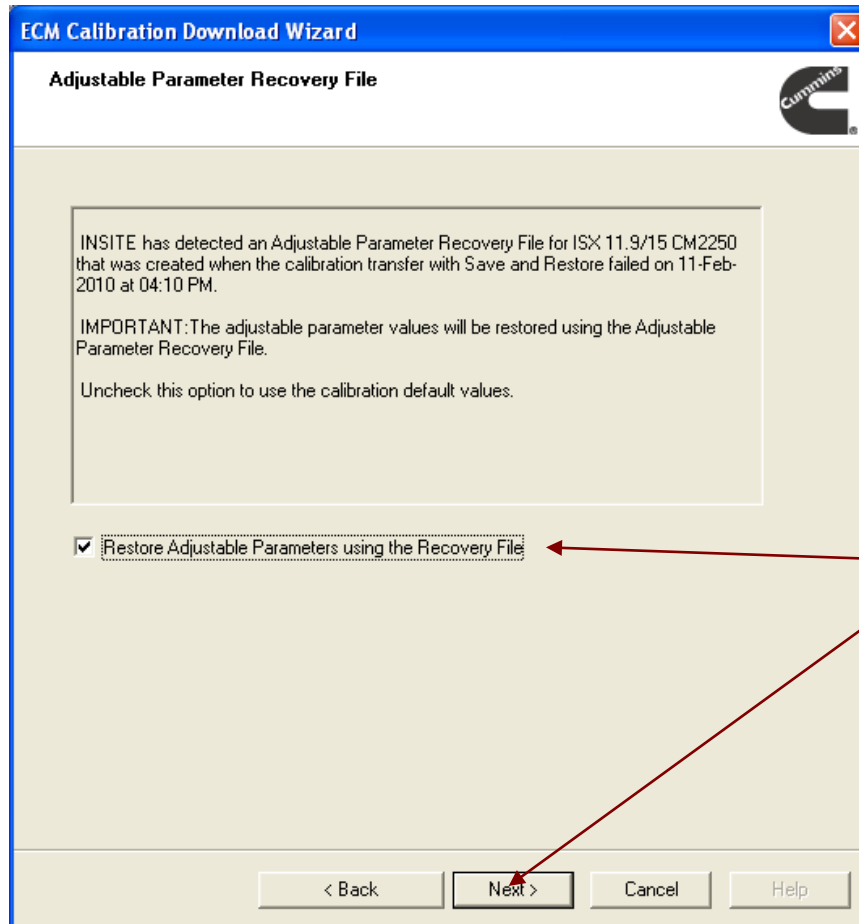

Adjustable Parameters Recovery File

- If a calibration download fails when Save/Restore Adjustable Parameters is selected, INSITE™ will save these parameters to an Adjustable Parameter Recovery File
- The file can be used by INSITE™ to restore the Dataplate and adjustable parameters on this ECM if it is in a ROM Booted or Foot Printed state on the next successful download

Adjustable Parameters Recovery File

Check the box to restore adjustable parameters and click Next to continue the calibration download

Calibration Selection

Calibration Supersession

- Supersession refers to the process of providing replacement calibrations for obsolete calibrations
- Superseded Calibrations are not active and not installed on the INCAL DVD
- Calibration Reduction has generated a large number of Superseded Calibrations

Calibration Selection

Calibration Supersession

- If INSITE has “Show Installed Calibrations” or “Show Active Calibrations” selected
 - Calibration Selection will not display the Superseded calibration
 - Auto detect will not find the Superseded calibration
- Uncheck “Installed Calibrations” and uncheck “Active Calibrations” on Tools menu
 - Tools > Calibration Selection or Alternate Click
- When downloading the replacement calibration, first select the Superseded calibration. A pop-up window will appear displaying the replacement calibration.
- View Replacement Calibrations
 - Tools > Calibration Selection > View Replacement Calibrations

Replacement Calibration

Click OK To ECM to continue calibration transfer with replacement ECM Code

PowerMatch calibrations are now able to be sent using INSITE

- The PowerMatch calibration will be based on an ECM Serial number and will only download to the specific ECM for which it was created
- Calibration download attempts to different ECMs will produce a warning message and will end the calibration download process

Calibration Selection Wrap Up

- Calibration Download is used to update the ECM
- Calibration Selection
 - Contact local distributor for Calibration and/or Calibration Authorization password
 - To view Superseded Calibrations, uncheck “Installed Calibrations” and uncheck “Active Calibrations”
- Use Calibration filtering to reduce number of Calibrations listed
- Calibration Authorization Password is required for updating or ROM Booted ECMs

Updated ECM Connection Wizard

The image shows a screenshot of the 'ECM Connection Wizard' dialog box. The title bar is blue with the text 'ECM Connection Wizard' and a close button. The main area has a light beige background. At the top, there's a section titled 'Connection Settings' with a sub-header 'You can choose the specific Connection settings based on the configuration of your computer.' Below this, there are four dropdown menus: 'Datalink Adapter Vendor' (set to 'Cummins Inc.'), 'Datalink Adapter' (set to 'INLINE 5'), 'Computer Port' (set to '<Select a Port>'), and 'Datalink Protocol' (set to '<Select a Port>'). The 'Computer Port' dropdown is open, showing a list of options: 'USB', '<Select a Port>', 'Communications Port (COM1)', 'Communications Port (COM3)', and 'Auto Detect'. The 'USB' option is highlighted in blue. A red arrow points from a text box on the left to the 'USB' option. At the bottom of the dialog, there are buttons for 'Help', '<Back', 'Next>', and 'Cancel'. A 'Datalink Adapter Connection Test' button is also present below the 'Datalink Protocol' dropdown.

Datalink Adapter Connection Test

The image shows a screenshot of the 'ECM Connection Wizard' dialog box, specifically the 'Connection Settings' tab. The dialog has a blue title bar with the text 'ECM Connection Wizard' and a close button. Below the title bar, the 'Connection Settings' section is highlighted, with a subtitle 'Please select the specific Connection Settings based on the system configuration.' and a small icon of a toolbox. The settings are organized into four groups, each with an icon and a dropdown menu:

- Datalink Adapter Vendor:** Icon of a toolbox, dropdown menu set to 'Cummins Inc.'
- Datalink Adapter:** Icon of a D-sub connector, dropdown menu set to 'INLINE 5'
- Computer Port:** Icon of a USB connector, dropdown menu set to 'USB'
- Datalink Protocol:** Icon of a network cable, dropdown menu set to 'Auto Detect'

Below these settings is a button labeled 'Datalink Adapter Connection Test'. A red arrow points from a text box on the right to this button. At the bottom of the dialog are four buttons: 'Help', '<Back', 'Next>', and 'Cancel'.

Ability to add Functionality Password when opening INSITE™ for the first time

- INSITE™ provides the capability to enter both the Basic and Functionality password the first time it is opened
- This applies to a new installation only
- After entering the Basic password, a window will open asking for the Functionality password to be entered

Before registering INSITE, log into the Windows account that will be used to access INSITE. This will help prevent unnecessary PCID transfer in case INSITE generates a different PCID for a different Windows login account.

If this is the Windows account that will be used to access INSITE, select OK to continue with the registration. Otherwise, select Cancel and log into the desired Windows account.

**Follow the instructions
and click OK**

Registration Required

INSITE has not been registered. In order to use this application, you need to contact the local distributor and obtain a Basic password. You will need to supply your PC ID when you call.

Security Information

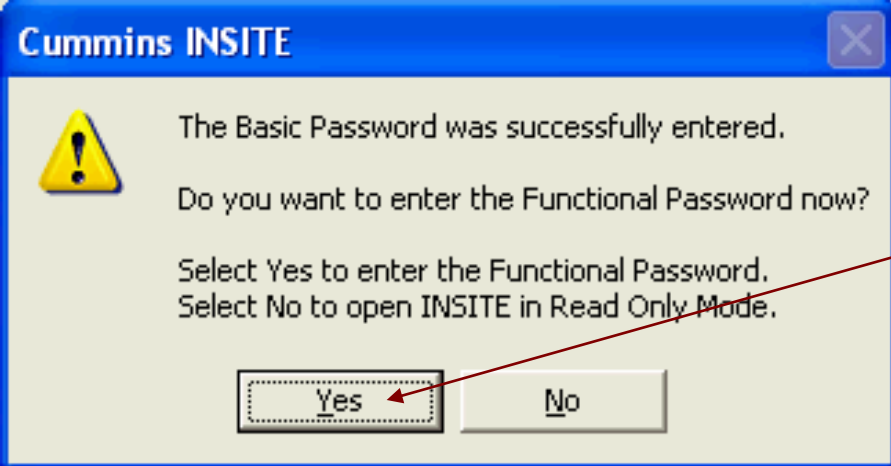

PC ID:

ZZZZZZZZ

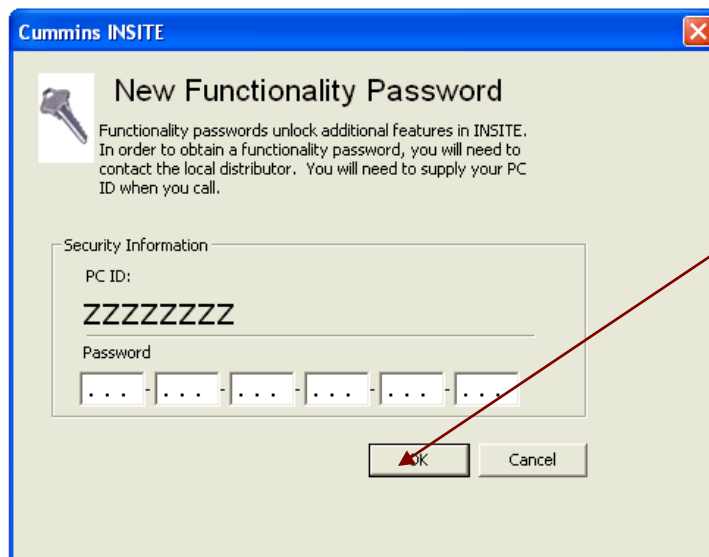

Password

... - ... - ... - ... - ... - ...

**Enter the Basic Password
and click OK**

Follow the instructions to enter the Functionality Password

Enter the Functionality Password and click OK

Engine Simulators

- INSITE can Simulate connections to all supported engines
 - Celect Plus, ISX, ISB...
 - Almost Full Simulated tool Functionality
 - Can be used for training or exploring Engine Features
 - Data is simulated and may not represent actual engine data
- Simulator can be used to learn INSITE and Engine features without being connected to an Engine

Connections Wrap Up

- Make sure the desired connection is selected
- To connect to ECM
 - Use Ctrl+E as a shortcut to get connected
 - Use the View Bar icon
 - Tool Bar icon to connect
 - Click on Tools → Connect to ECM

You have concluded this section of the training.
Please click to the next slide and continue or [Click Here](#) to return to the Table of Content.

INSITE™ Data Monitor/Logging and OBD Monitors

Electronic Service Tools

Innovation You Can Depend On™

Data Monitor / Logger

Method to view or log live engine data at a user defined sample rate.

- Monitor data:
 - View selected parameters to display
- Log data:
 - Continuous logged data for each parameter selected and saved to a file for analysis
- Snapshot:
 - Single data point logged for each parameter selected and saved to a file for analysis

Data Monitor / Logger

Data Monitor / Logger Limits

- The Lower Limit and Upper Limit column titles have been replaced with "Min Measured" and "Max Measured"
- The Min Measured column now contains the minimum value observed for each parameter during an open Data Monitor/Logger session.
- The Max Measured column now contains the maximum value observed for each parameter during an open Data Monitor/Logger session.
- The Out of Range Parameter window will no longer be used and has been removed.

Data Monitor / Logger

Increasing the font size in Data Monitor/Logger:

- Select Tools → Options and select Appearance under the General settings

Data Monitor/Logging

- An event can be marked while logging in the main Data Monitor / Logger screen, or when in Graphical Monitoring, by pressing the spacebar
- This provides the option to enable or disable the Event Marker as well as providing the option to create comments for event markers
- The Log file contains the Event Marker Description. For more information on Data Monitor/Logger, refer to Data Monitor logger module on slide 20.

Data Monitor / Logger

Wrap Up

- Data Monitor/Logger provides a means to View, Log or Snapshot live engine data
- Log and Snapshot files can be saved as a CSV or Tab delimited (.txt) files for analysis in Excel
- The Data Monitor/Logger appearance can be modified through Tools → Options to display data in a larger font
- Graphical Monitoring is a way to display, log, print, and save data for up to six parameters in a graph

OBD Monitors

- The OBD system monitors components that can affect the emission performance of the vehicle
- Displays a map of all available fault codes with associated monitor type and its readiness status.
- OBD Monitors are never cleared from this view
- User can refresh the view

Welcome to the ECM Diagnostic Tests Wizard.

This wizard helps you through the steps needed to run an ECM Diagnostic Test.

To continue, select a test from the list below and press the Next button.

Centinel Operational Test

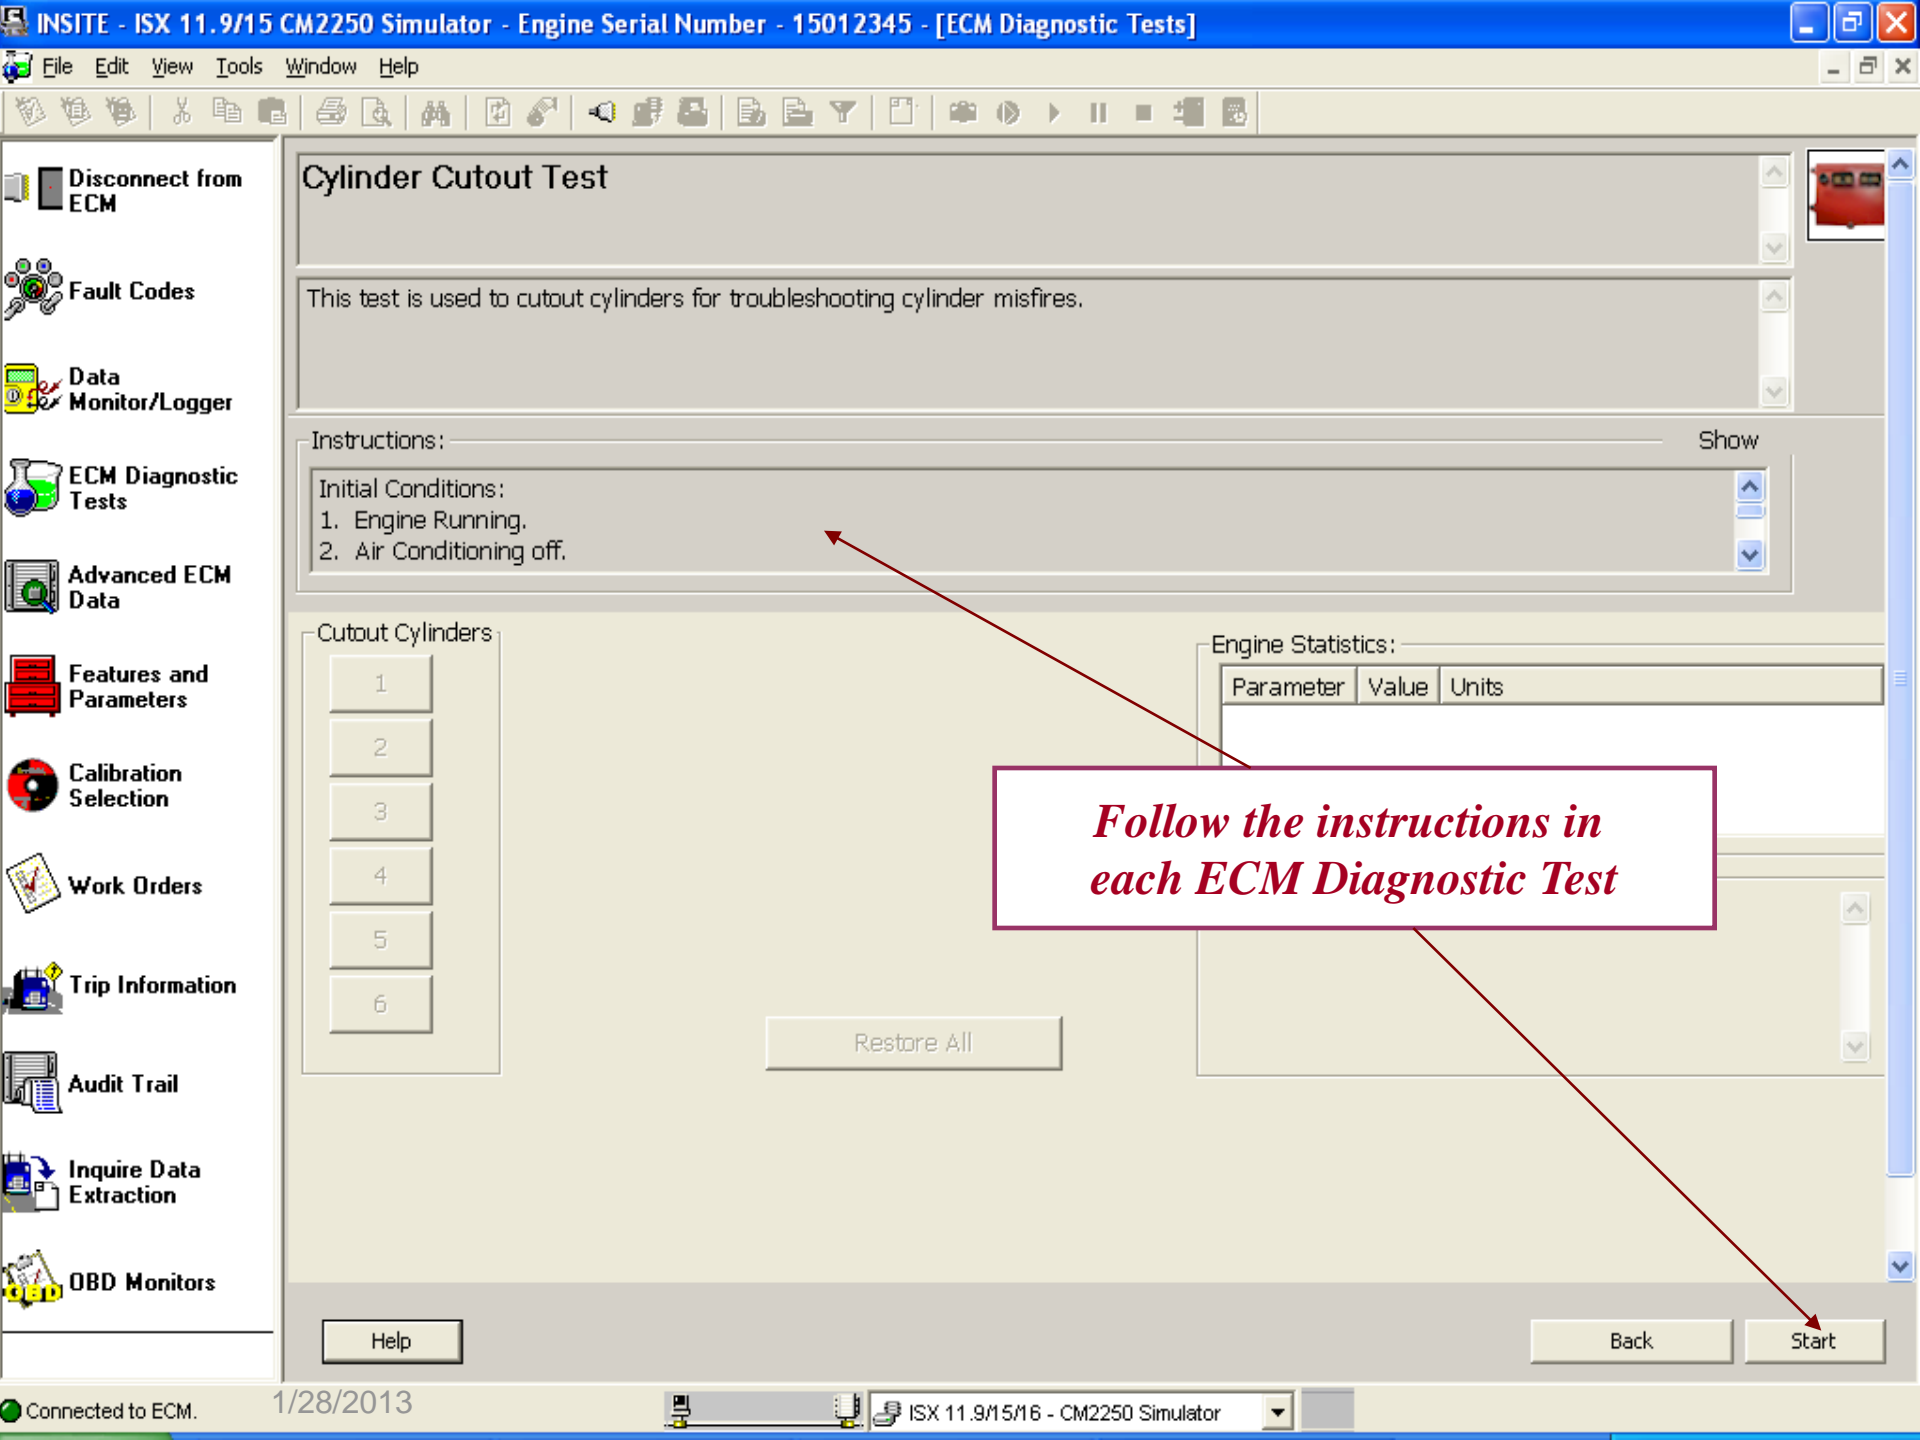

- Cylinder Cutout Test
- Cylinder Performance Test
- EGR Valve / Turbocharger Operational Test
- EGR Valve Test
- Engine State Monitor
- Fan Override Test
- Injector Check Valve Diagnostics Test
- SAE J1939 Datalink Control Test
- Setup for Dynamometer
- Turbocharger Actuator Test

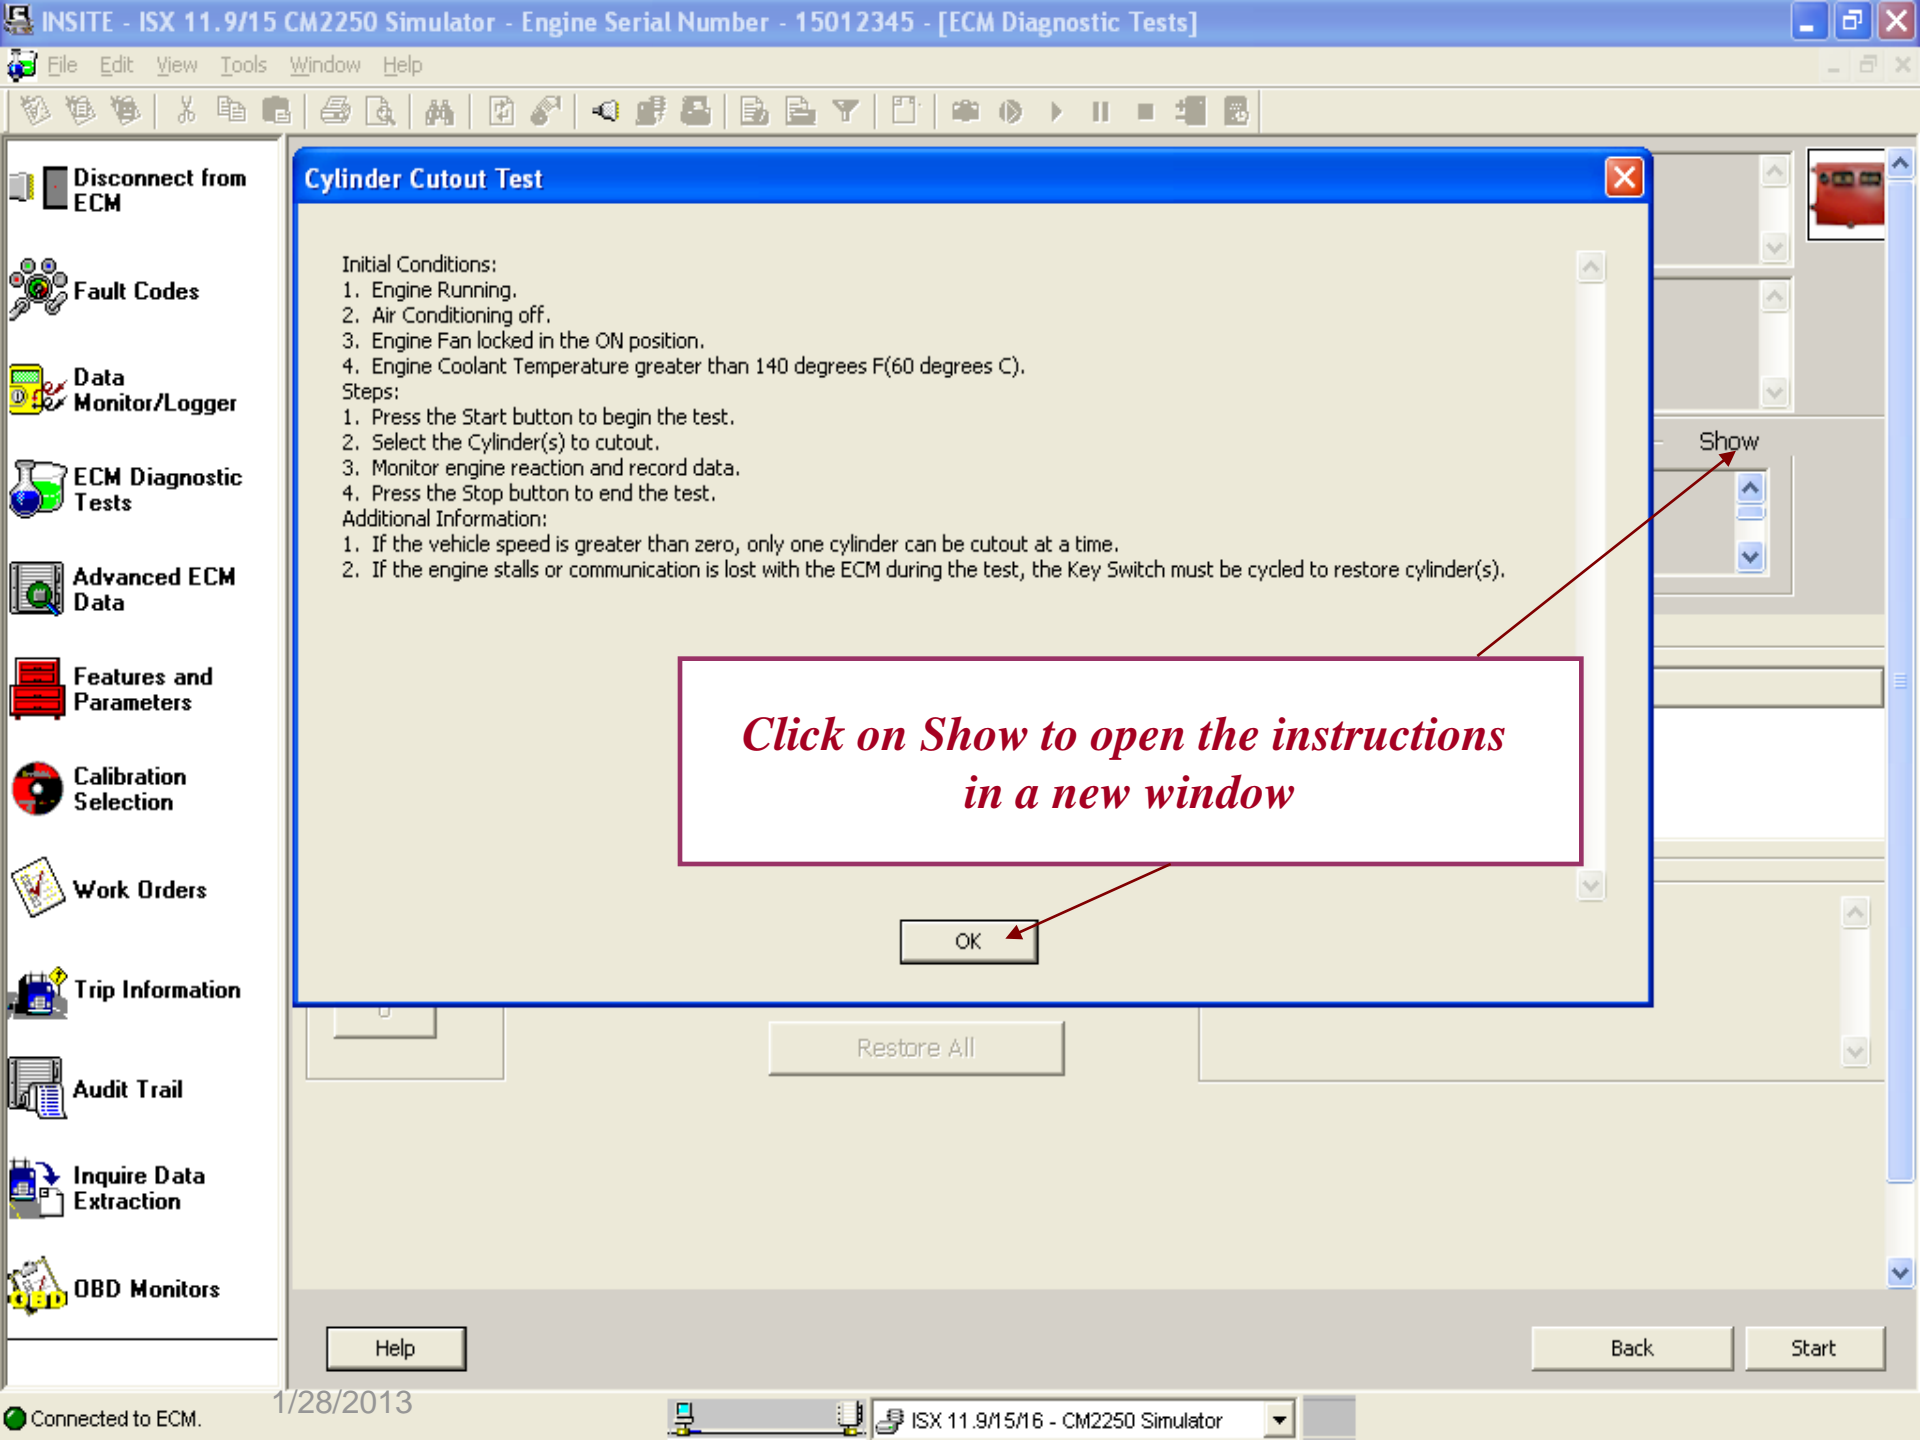

*Double Click the test or
Select the ECM Diagnostic Test
and then click Next*

Next

Cylinder Cutout Test

Initial Conditions:

1. Engine Running.
2. Air Conditioning off.
3. Engine Fan locked in the ON position.
4. Engine Coolant Temperature greater than 140 degrees F(60 degrees C).

Steps:

1. Press the Start button to begin the test.
2. Select the Cylinder(s) to cutout.
3. Monitor engine reaction and record data.
4. Press the Stop button to end the test.

Additional Information:

1. If the vehicle speed is greater than zero, only one cylinder can be cutout at a time.
2. If the engine stalls or communication is lost with the ECM during the test, the Key Switch must be cycled to restore cylinder(s).

*Click on Show to open the instructions
in a new window*

Roll Back Option

- INSITE™ provides the capability to roll back to the previous base version
- For example, INSITE™ 7.5.1 can be rolled back to INSITE™ 7.5 by using uninstall update in the Control Panel

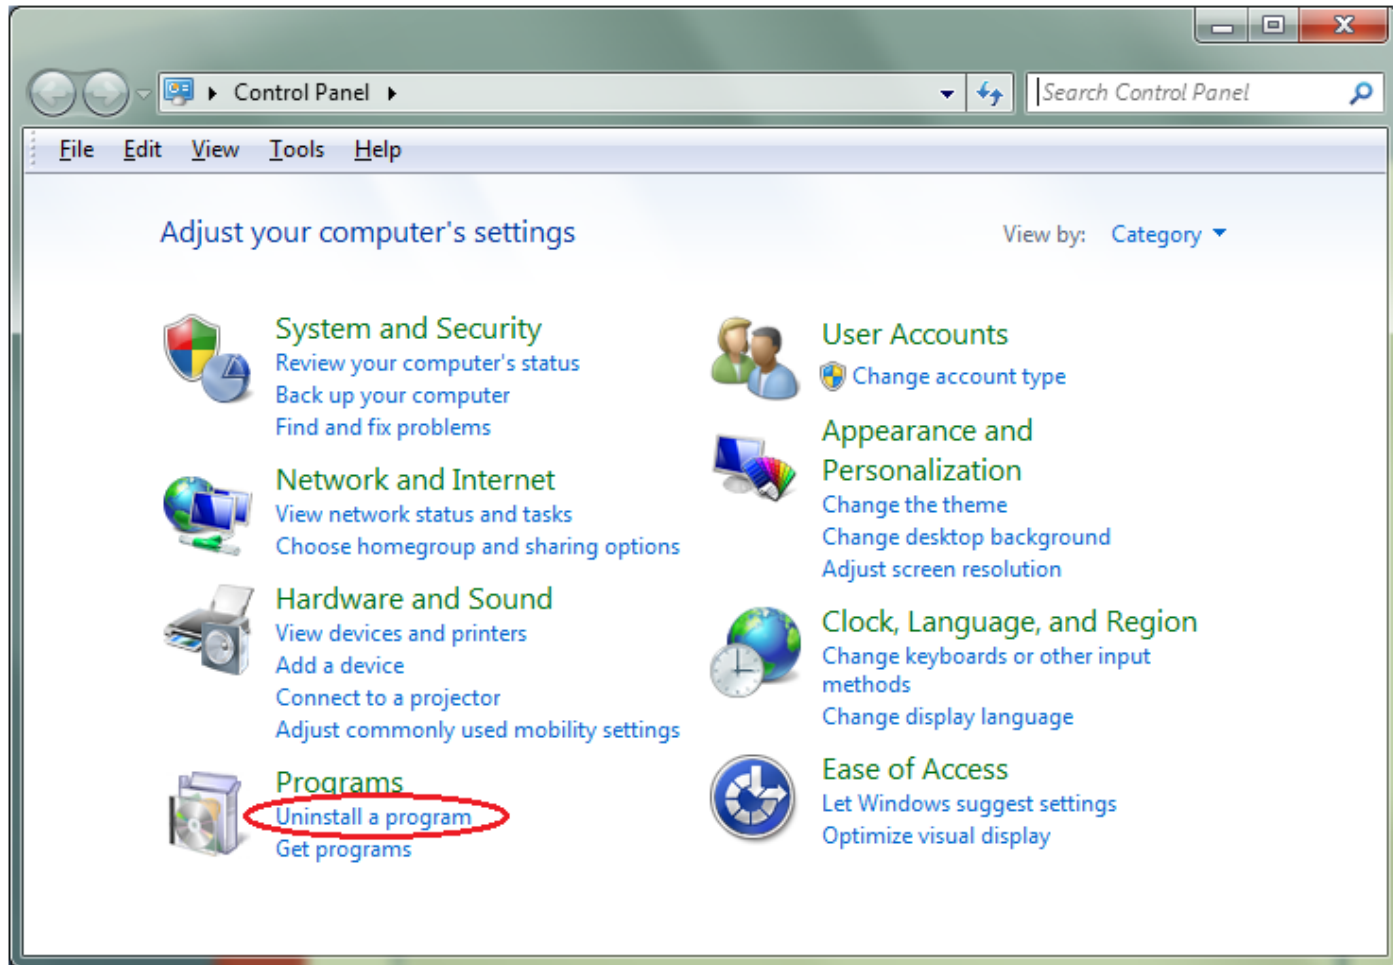

Roll Back Option

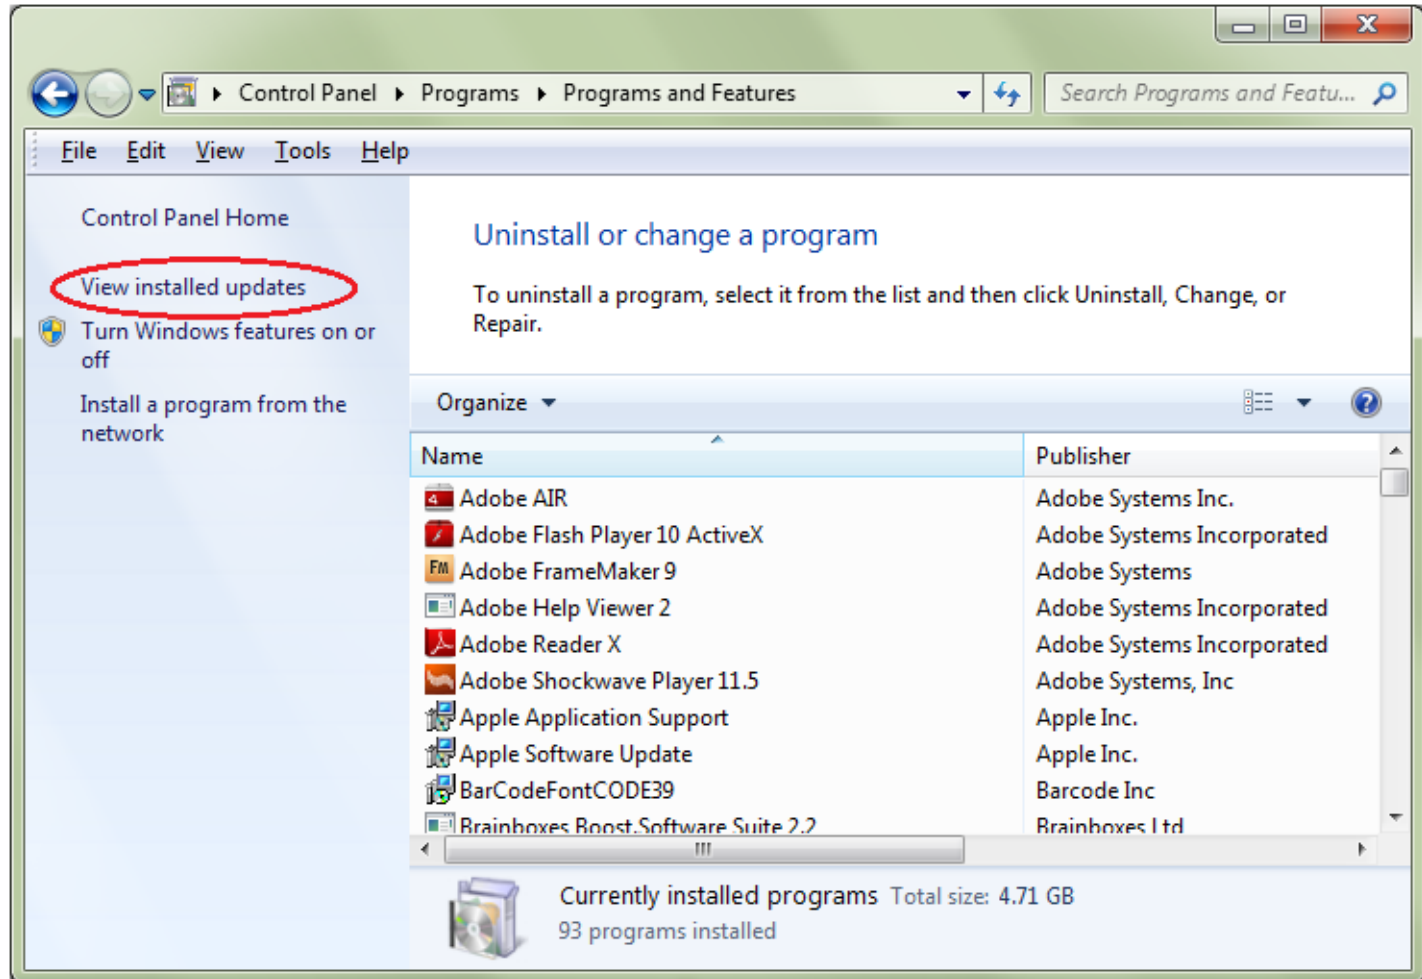

- On a Windows 7 or Windows Vista PC
 - Go to Start > Control Panel > Programs > Uninstall a Program. On the upper left hand side, click on **View installed updates**. Select INSITE™ 7.5.1 from the list and click **Uninstall**. Follow the prompts to uninstall INSITE™ 7.5.1
- On a Windows XP PC
 - Go to Start > Control Panel > Add/Remove Programs. On the top, check the box **Show updates**. Select INSITE™ 7.5.1 from the list and click **Uninstall**. Follow the prompts to uninstall INSITE™ 7.5.1
- Note: The PC may need to be restarted after uninstalling INSITE™ 7.5.1

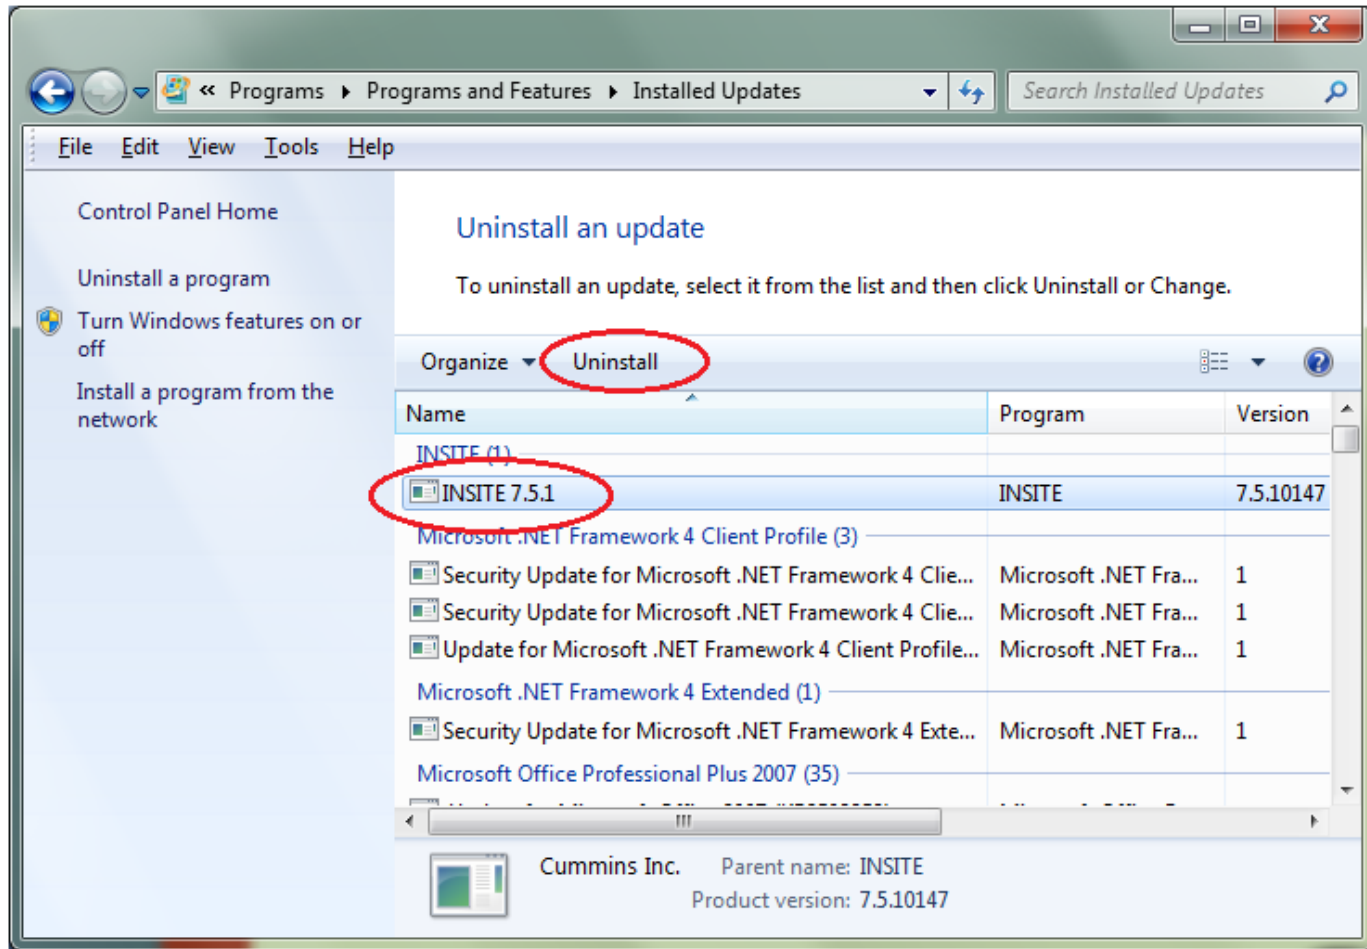

Roll Back Option – Windows 7/Vista

Roll Back Option – Windows 7/Vista

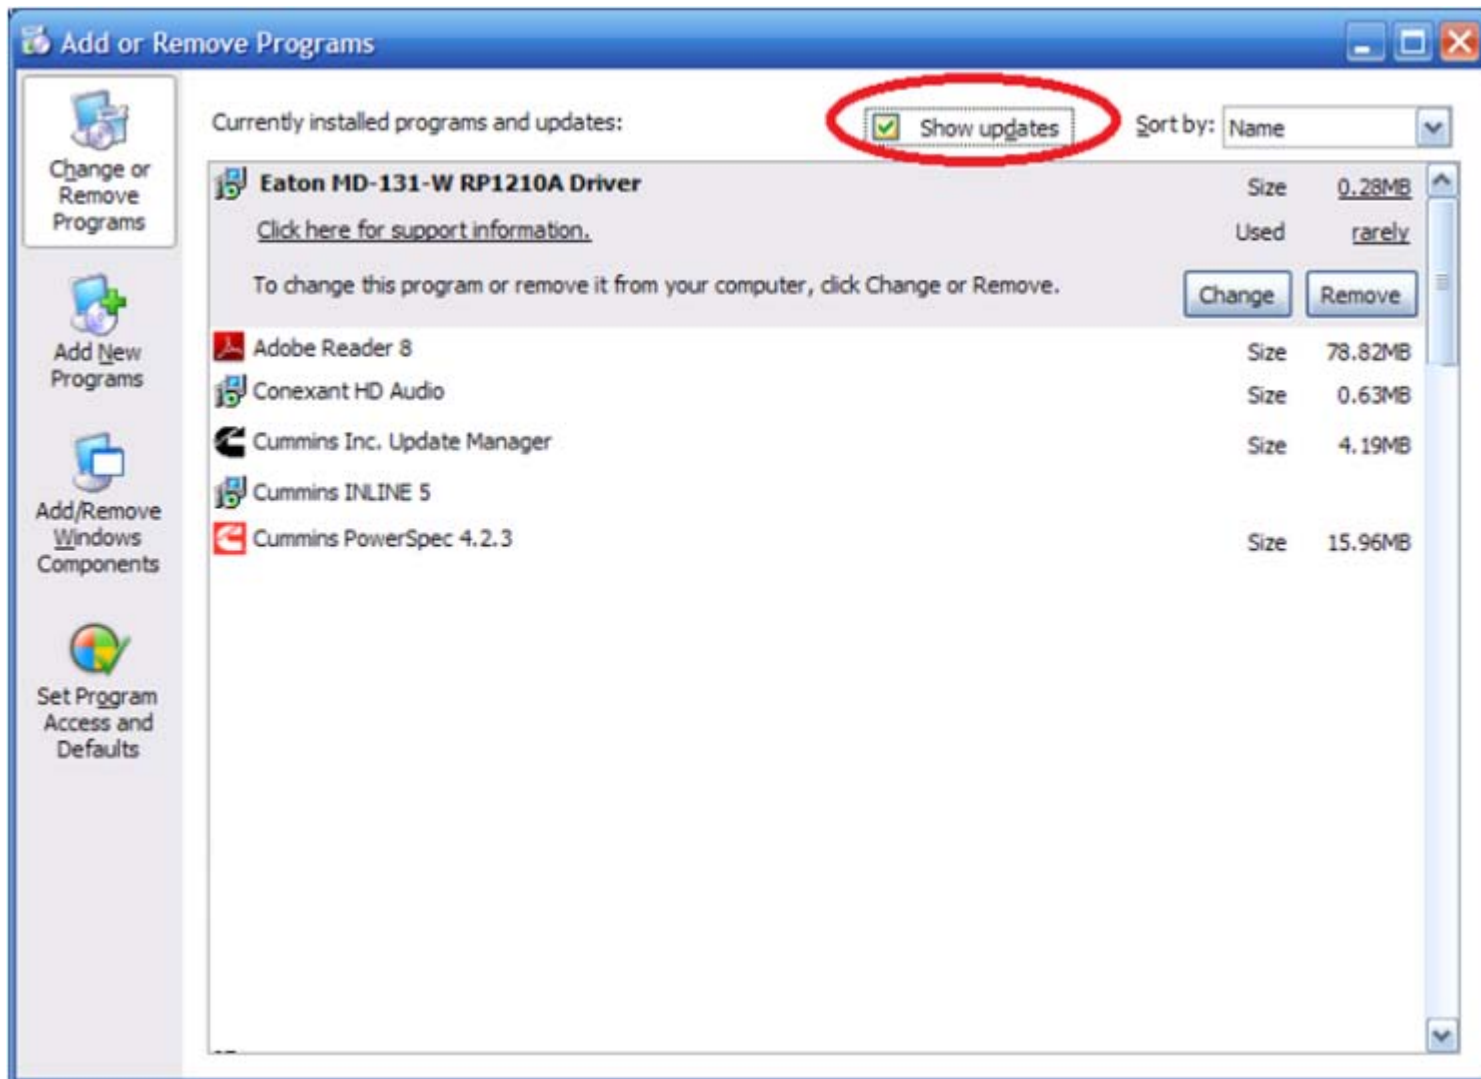

Roll Back Option – Windows 7/Vista

Roll Back Option – Windows XP

Roll Back Option – Windows XP

Roll Back Option – Windows XP

Roll Back Option Wrap Up

- INSITE™ provides the capability to roll back to the previous version

Trip Information Wrap Up

- Allows the user to view ECM Values for multiple time periods:
 - Lifetime of the ECM
 - Since the Trip Information was last reset
- Trip Fuel Report will display all fuel related parameters for the above time periods
- INSITE™ allows the user to print these screens

You have concluded this section of the training.

INSITE™ Work Orders

Electronic Service Tools

Work Orders

- A Work Order is the top level identifier that contains the ECM image(s). Work Orders can be used for tracking vehicle and equipment repair history.
- An Image is a copy of the ECM data
- Work Orders may contain multiple Images
 - By default, an “Initial” image is created when connecting to an ECM with the Work Order Mode enabled
 - By default, a “Final” image is created when disconnecting from an ECM with the Work Order Mode enabled
 - Additional “User” images may be created under each Work Order while connected to the ECM
- Work Orders can be created automatically by INSITE™ or manually by the user

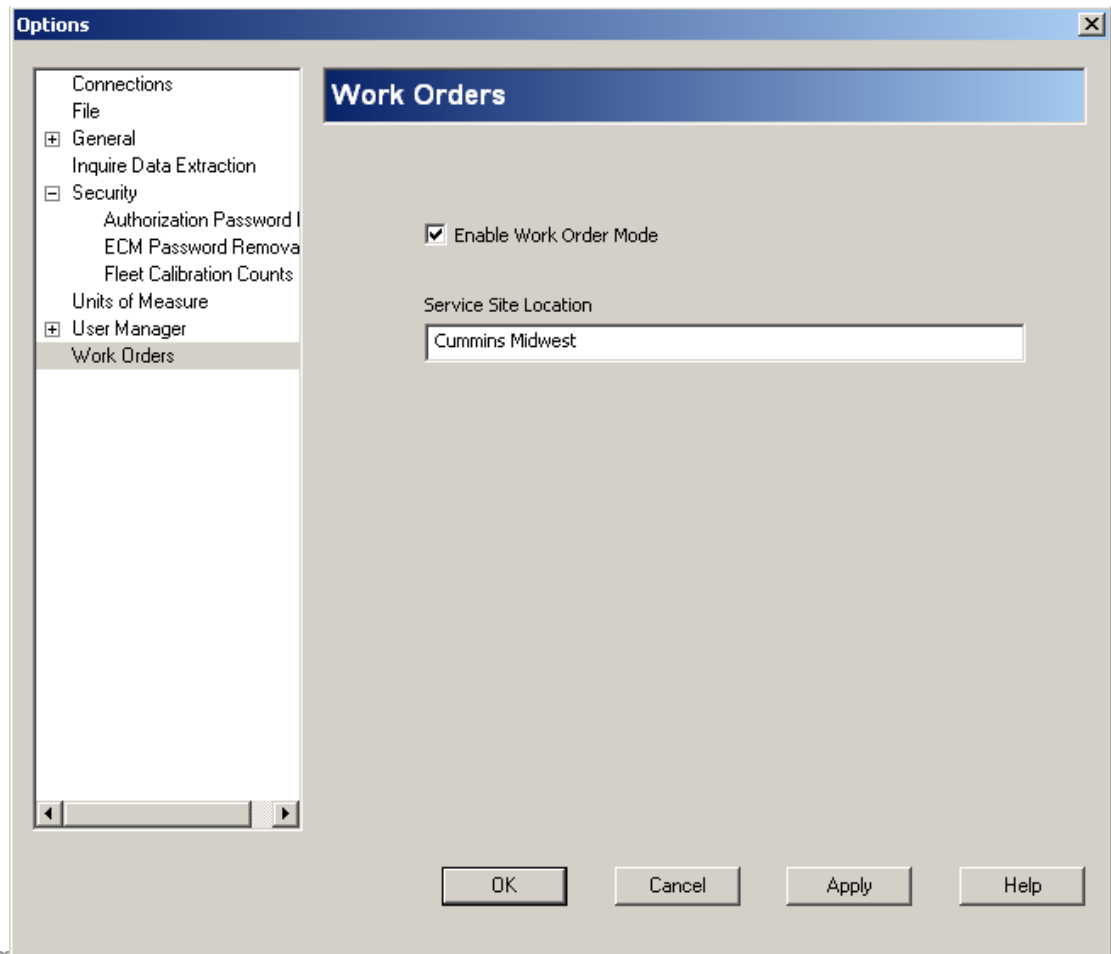

Work Orders

To have INSITE™ automatically create Work Orders when connecting and disconnecting:

Select Tools →
Options → Work
Orders

- Select “Enable Work Order Mode”

By default this feature is Enabled when INSITE™ is installed.

Work Orders

- When connected to an ECM, only Work Orders compatible with that ECM serial number will be displayed
- Disconnect from an ECM to view all Work Orders
- Work Order and Image names are defaulted to a Date – Time format (i.e. WO-20041027-145950 = 10/27/2004-2:59:50). These names can be changed at the time of creation or under the Work Order properties to help identify the specific customer, vehicle or equipment

Work Orders

- With Work Order Mode enabled and no compatible Work Orders exist, a New Work Order dialog will be displayed after connection to the ECM

- Enter the Work Order Number, Image Name and Select OK
- If you do not wish to create a new Work Order, select Cancel

Print OK Cancel Help

Work Orders

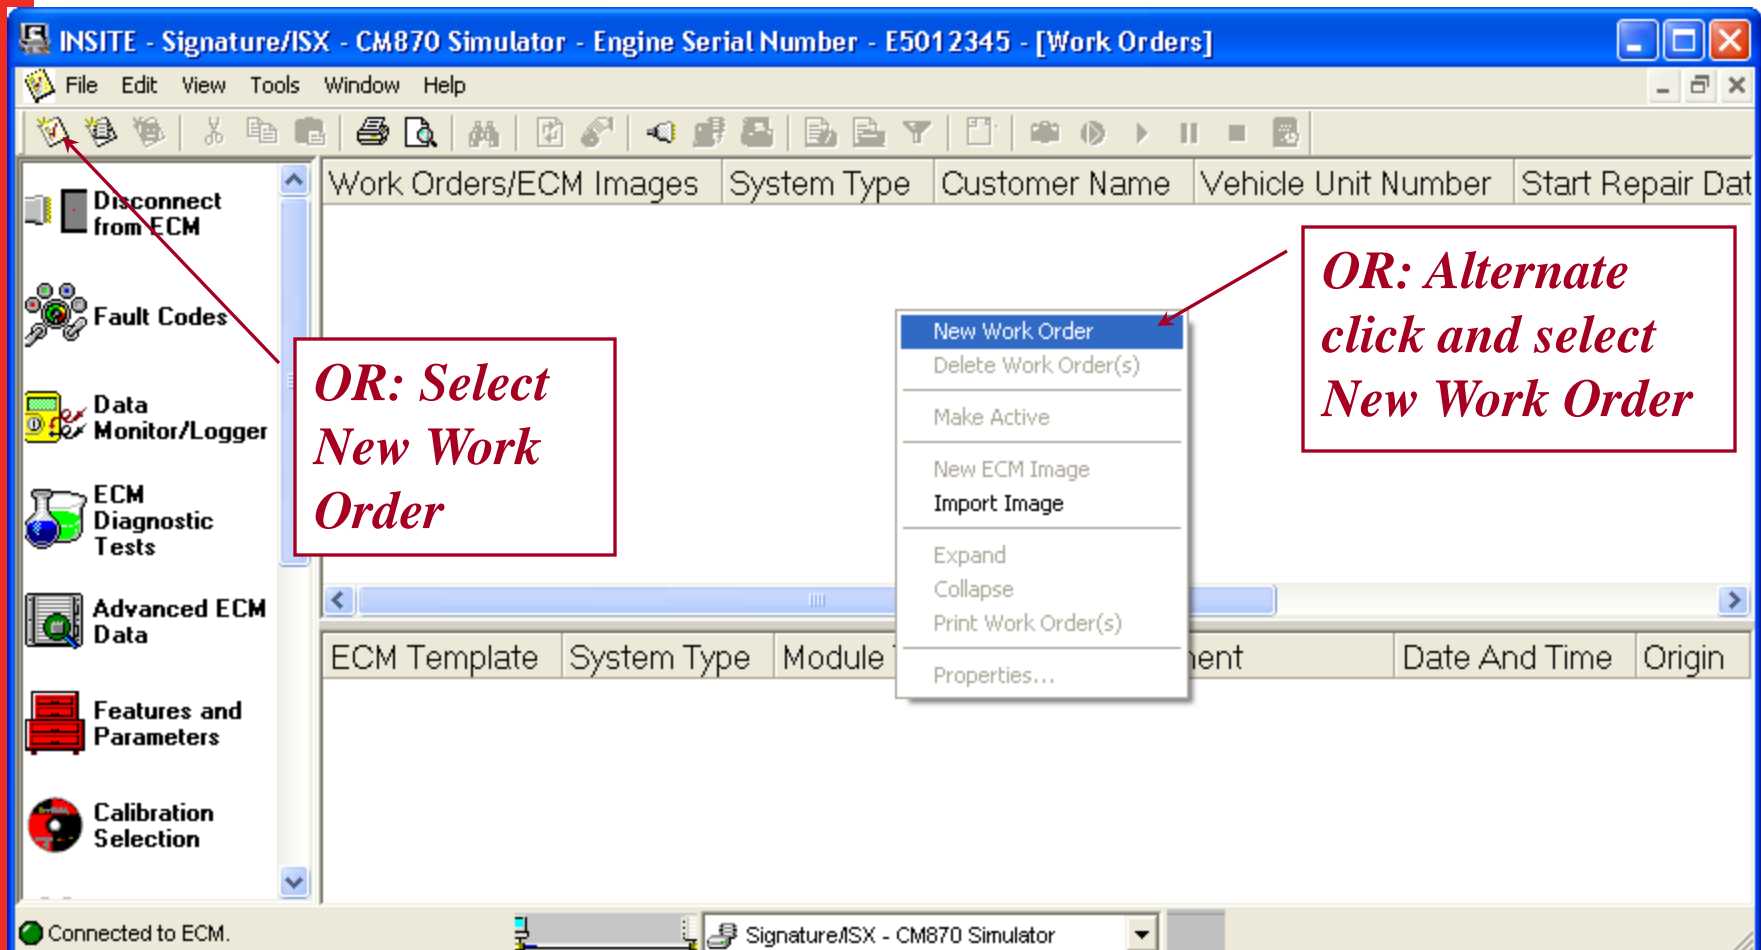

- With Work Order Mode enabled and compatible Work Orders exist, the New/Activate Work Order dialog will be displayed after connection to the ECM
 - Select New to create a new Work Order
 - OR: Select one of the compatible Work Orders in which to create a new Image and select OK
 - Enter the Image Name and confirm the creation by selecting OK
 - OR: Select Cancel if you do not wish to create an Image

Work Orders

Manually creating New Work Orders

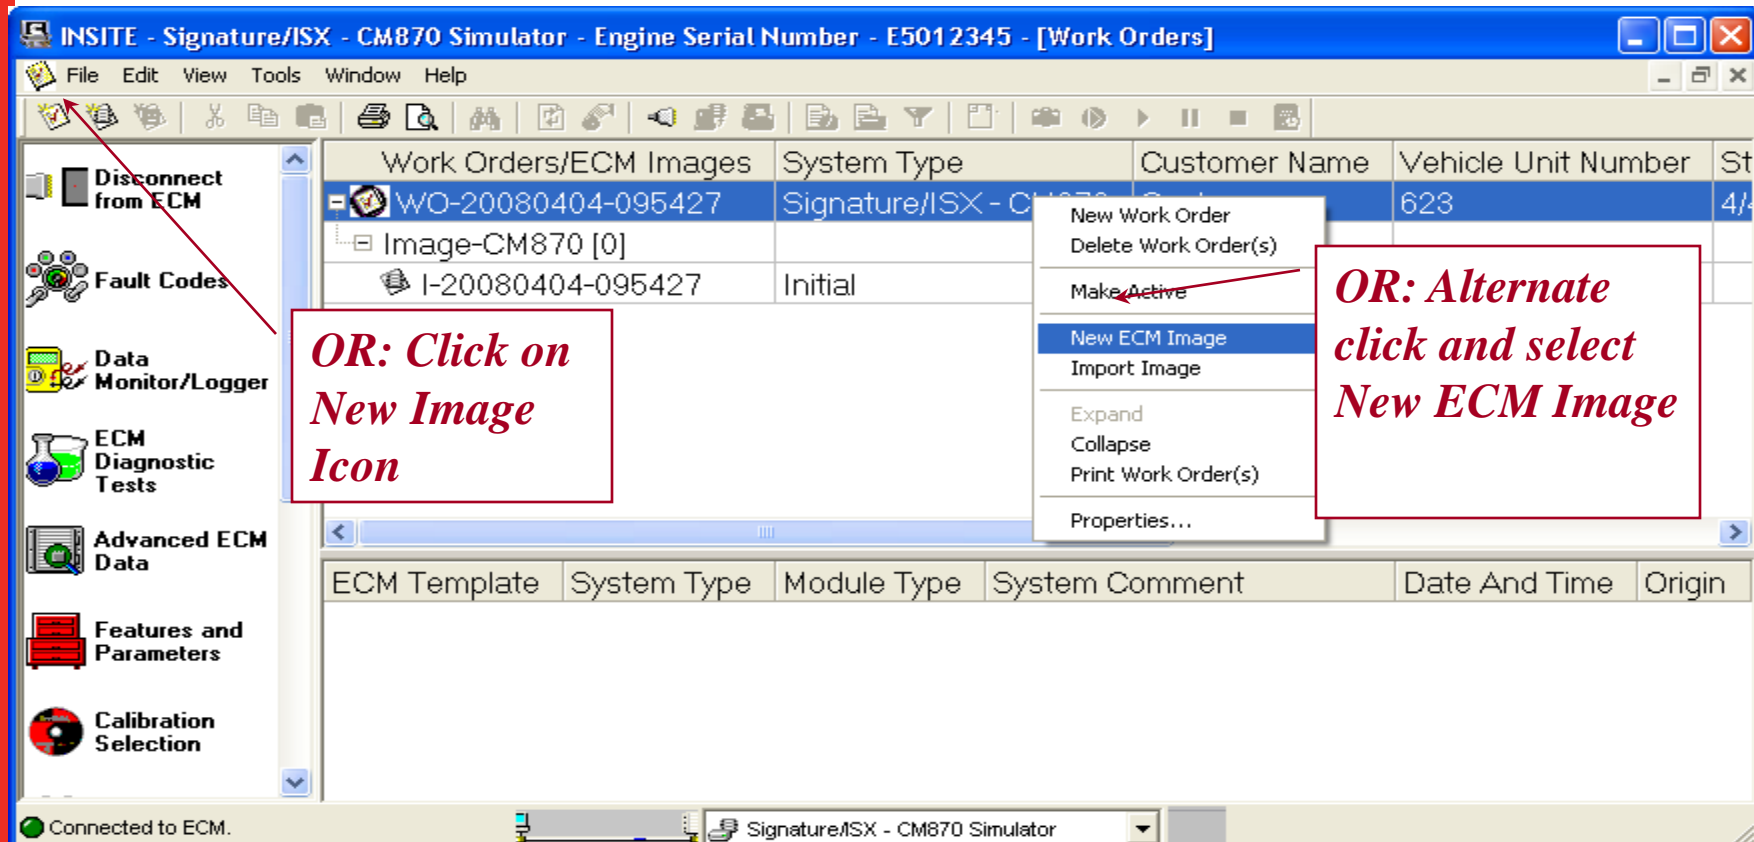

- Select File → New → Work Order...

Work Orders

Manually creating New ECM Image

- Select File → New → ECM Image...
- The new Image will be created in the Active Work Order

Work Orders

- Each image can be exported for use in two ways:
 - Exported as an INSITE compatible file, .eif (exported image file) to be imported by another user with INSITE
 - To an external file, “Image Name.csv” (Comma Separated Value)
 - This format can be opened with Excel, Word, Notepad, etc.
- All Work Order images can be exported using the right-click menu and selecting the ‘Export All Images’ option. Highlight the Work Order image and right-click to export all images

Work Orders

The screenshot displays the INSITE - ISX - CM871 Simulator interface. The main window shows a table of Work Orders. A right-click context menu is open over the first row, with the 'Export All Images' option highlighted. A red arrow points from a text box to this option.

Work Orders/ECM Images	System Type	Customer Name	Vehicle Unit Number	Engine Serial Number	Start Repair Date	Last Modified D
SW-20110425-114900	ISX - CM871	Customer	UNIT001	15012345	25-Apr-2011 11:49:00 AM	25-Apr-2011 11

SI-20110425-114900						25-Apr-2011 11

ECM Template System Comment Date And Time Origin

Right-Click and select Export All Images

Work Orders

- Importing an Image
 - Alternate Click in the Work Order area and select Import Image
 - Select the Image to be imported

- Opening an Image
 - INSITE's exported ECM images (.eif) can be opened by double clicking .eif file
 - INSITE™ will open, import the image, and automatically connect to it
 - If INSITE™ is already open, the ECM image will be imported but not automatically connected

- Convert to a Template
 - Alternate Click on the Image and select Convert to Template
 - Templates provide a means of configuring multiple ECM's with the same base parameter settings

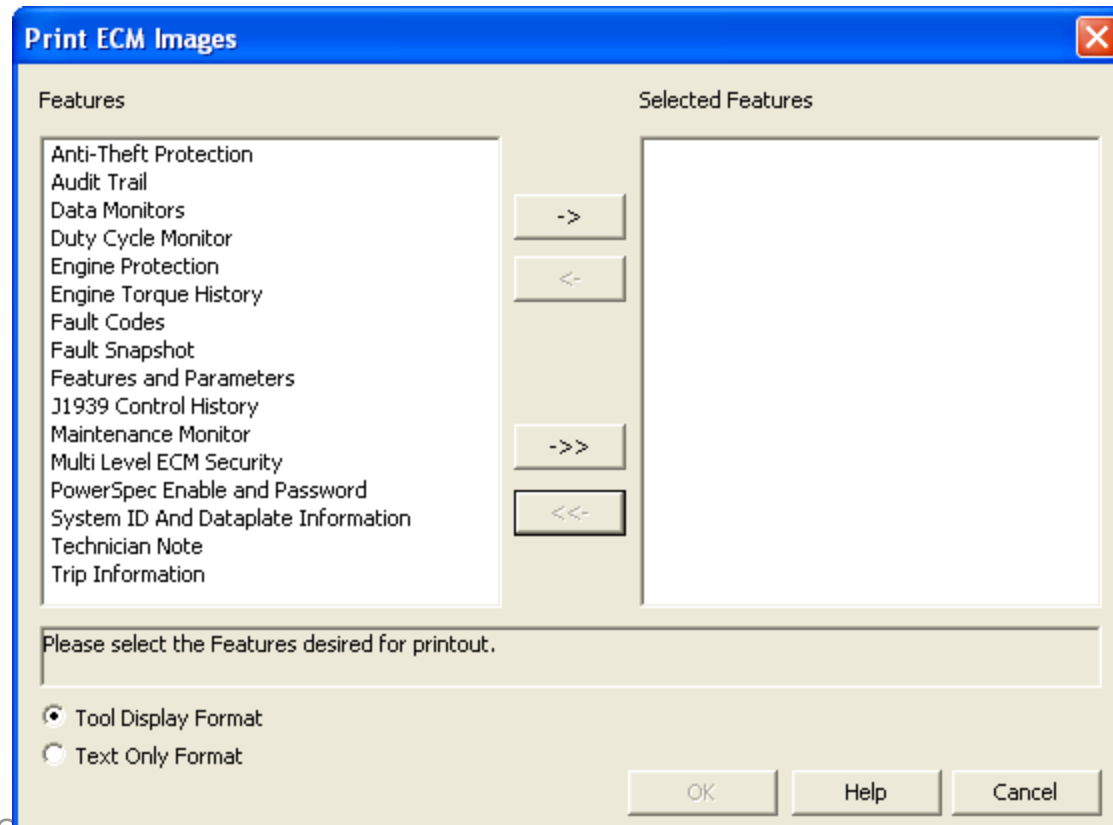

Work Orders

Printing ECM Images

- Select the ECM Image
 - Select File → Print
 - OR: Alternate right click – Print ECM Image(s)

**Select single
features with (- >)
or all with (- >>)**

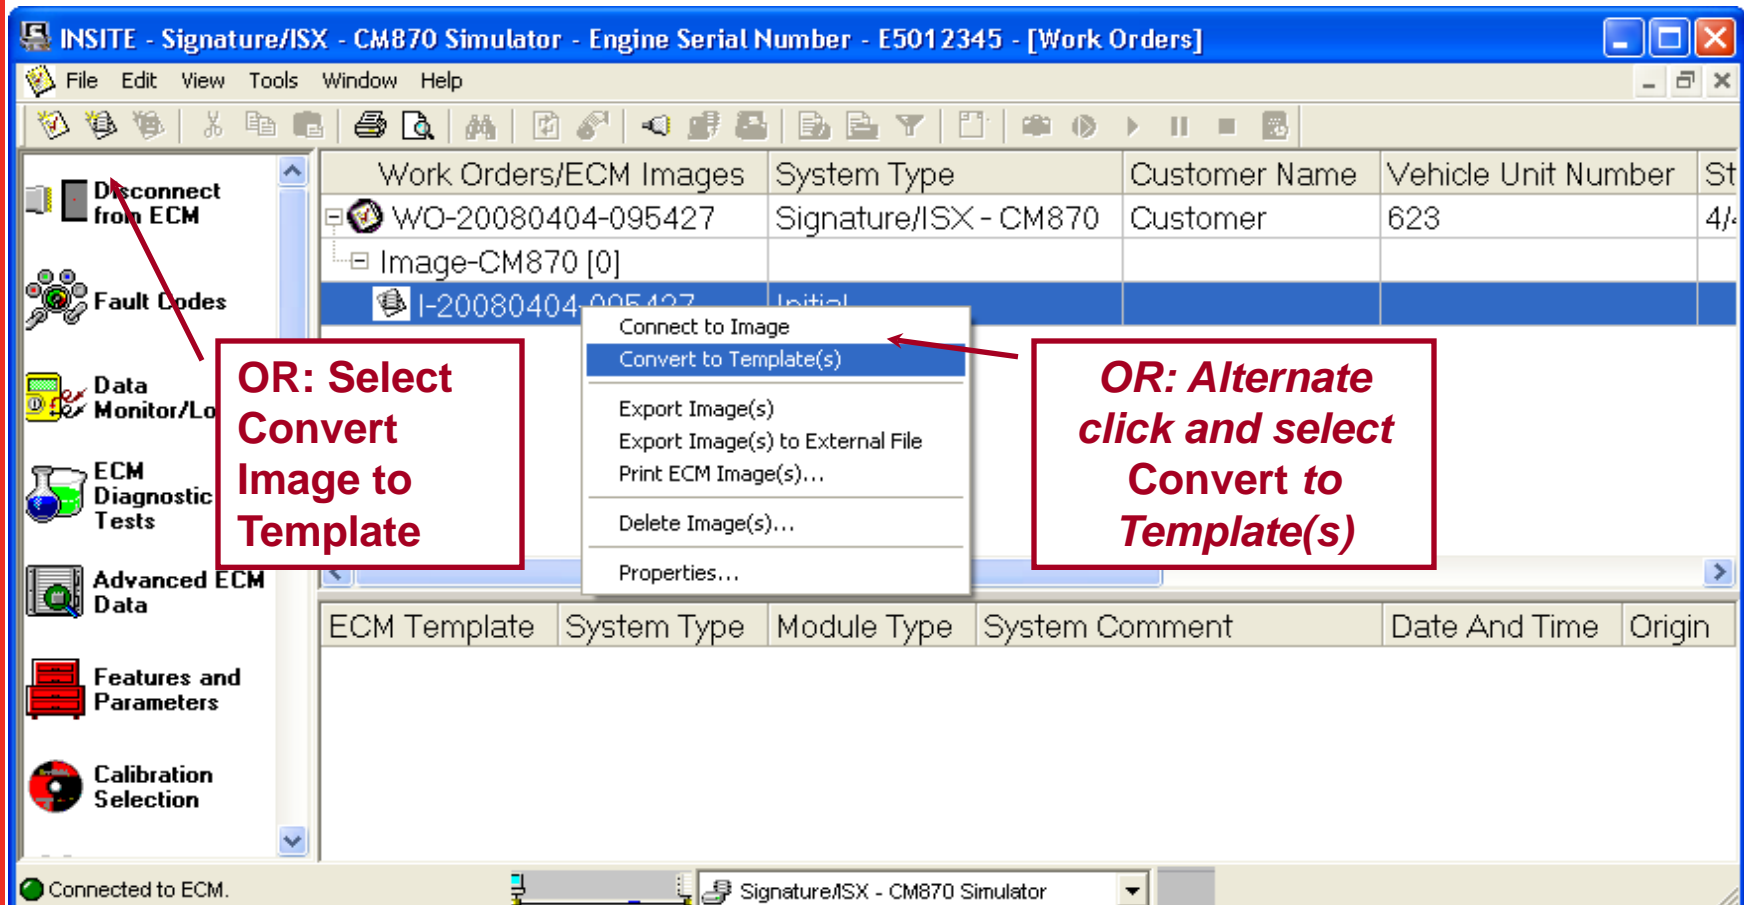

**Select Tool
Display for
Graphical print or
Text Only Format**

Templates

Templates can be created from an ECM Image to allow transferring the same Feature and Parameter setup from that Image to multiple ECMs

- Select Image then select File → Convert → ECM Template

Templates

To send a template to an ECM, select the Template:

- Select File → Send To → ECM...

The screenshot shows the INSITE - Signature/ISX - CM870 Simulator window. The 'Work Orders/ECM Images' table is visible, with the following data:

Work Orders/ECM Images	System Type	Customer Name	Vehicle Unit Number	St
WO-20080404-095427	Signature/ISX - CM870	Customer	623	4/4
Image-CM870 [0]				
I-20080404-095427	Initial			

A red arrow points to the 'WO-20080404-095427' row. Below the table, the 'ECM Template' table is partially visible:

ECM Template	System Type	Module Type	System Comment	Date
T-20080404-102106	Signature/ISX - CM870			4/4/20

A context menu is open over the 'T-20080404-102106' row, showing the following options:

- Send to ECM
- Export Template(s)
- Import Template
- Print Template(s)
- Delete Template(s)
- Properties...

A red arrow points to the 'Send to ECM' option. The left sidebar contains the following options:

- Disconnect from ECM
- Fault Codes
- Data Monitor/Logger
- Advanced ECM Data
- Features and Parameters
- Calibration Selection

The status bar at the bottom indicates 'Connected to ECM.' and 'Signature/ISX - CM870 Simulator'.

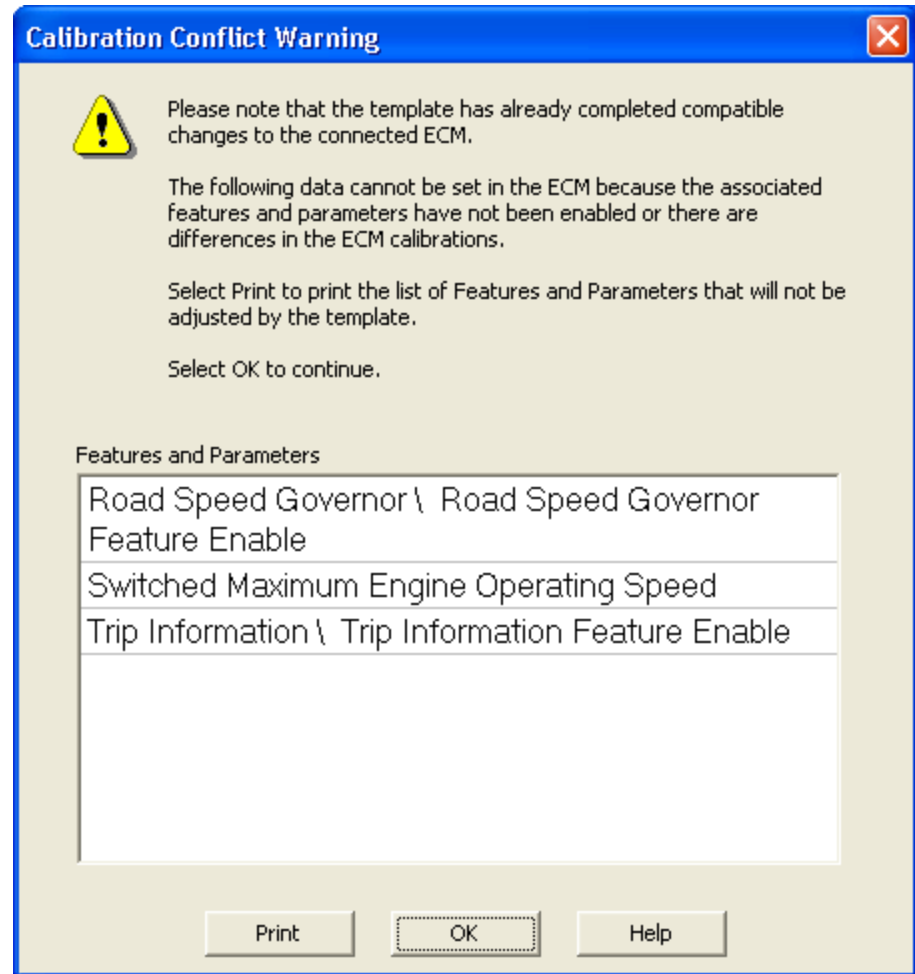

OR: Select Send to ECM

OR: Alternate click and Send to ECM

Templates

Template Report

- Ability to report which parameters were not able to be written to ECM
- User can use this to setup the vehicle accordingly

Work Order Wrap Up

- A Work Order is the top level identifier and can contain multiple ECM Images
- Only compatible Work Orders are displayed when connected to an ECM. All Work Orders will display when not connected
- Work Order Mode is defaulted ON and can be used to create Initial and Final Images upon Connect and Disconnect respectively
- Images can be converted to Templates to allow the Features and Parameters from that Image to be transferred to other ECMs

Cummins® Inc. Update Manager

Electronic Service Tools

Cummins® Inc.

Update Manager Overview

- Provides up-to-date information for INSITE™
 - Fault Information System (FIS) files
 - Help and Manual files
 - Feature Packs
 - Service Packs
- Provides an Automatic Update Notification Alert when updates are available through the internet

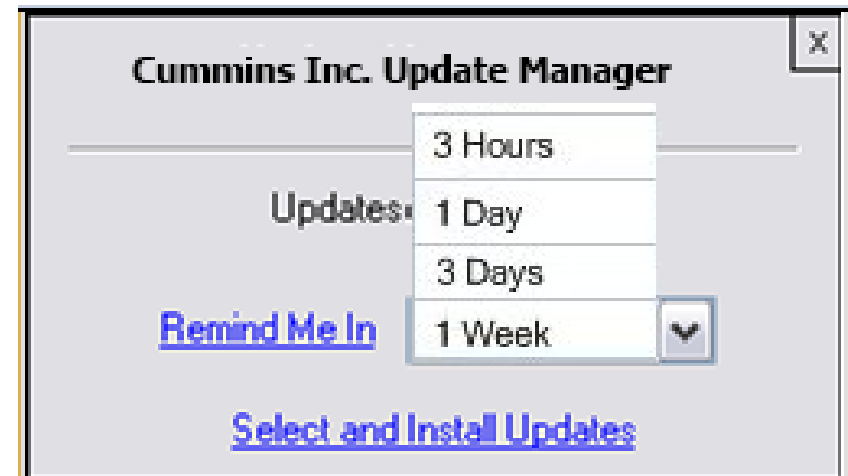

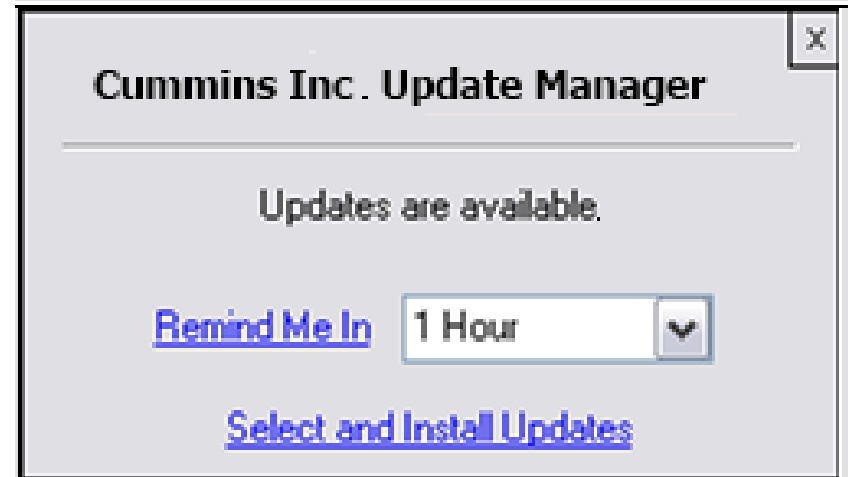

- Contents...
- Search...
- What's This? Shift+F1
- Index...
- Fault Trees Overview...
- Fault Trees Troubleshooting Steps
- Fault Trees Index...
- Check For Updates**
- License Agreement
- About INSITE

Check for Updates

Automatic Update Notification Alert

The Automatic Update Notification Alert will display at a specified day and time if updates are available

Choose “Remind Me In” or “Select and Install Updates”

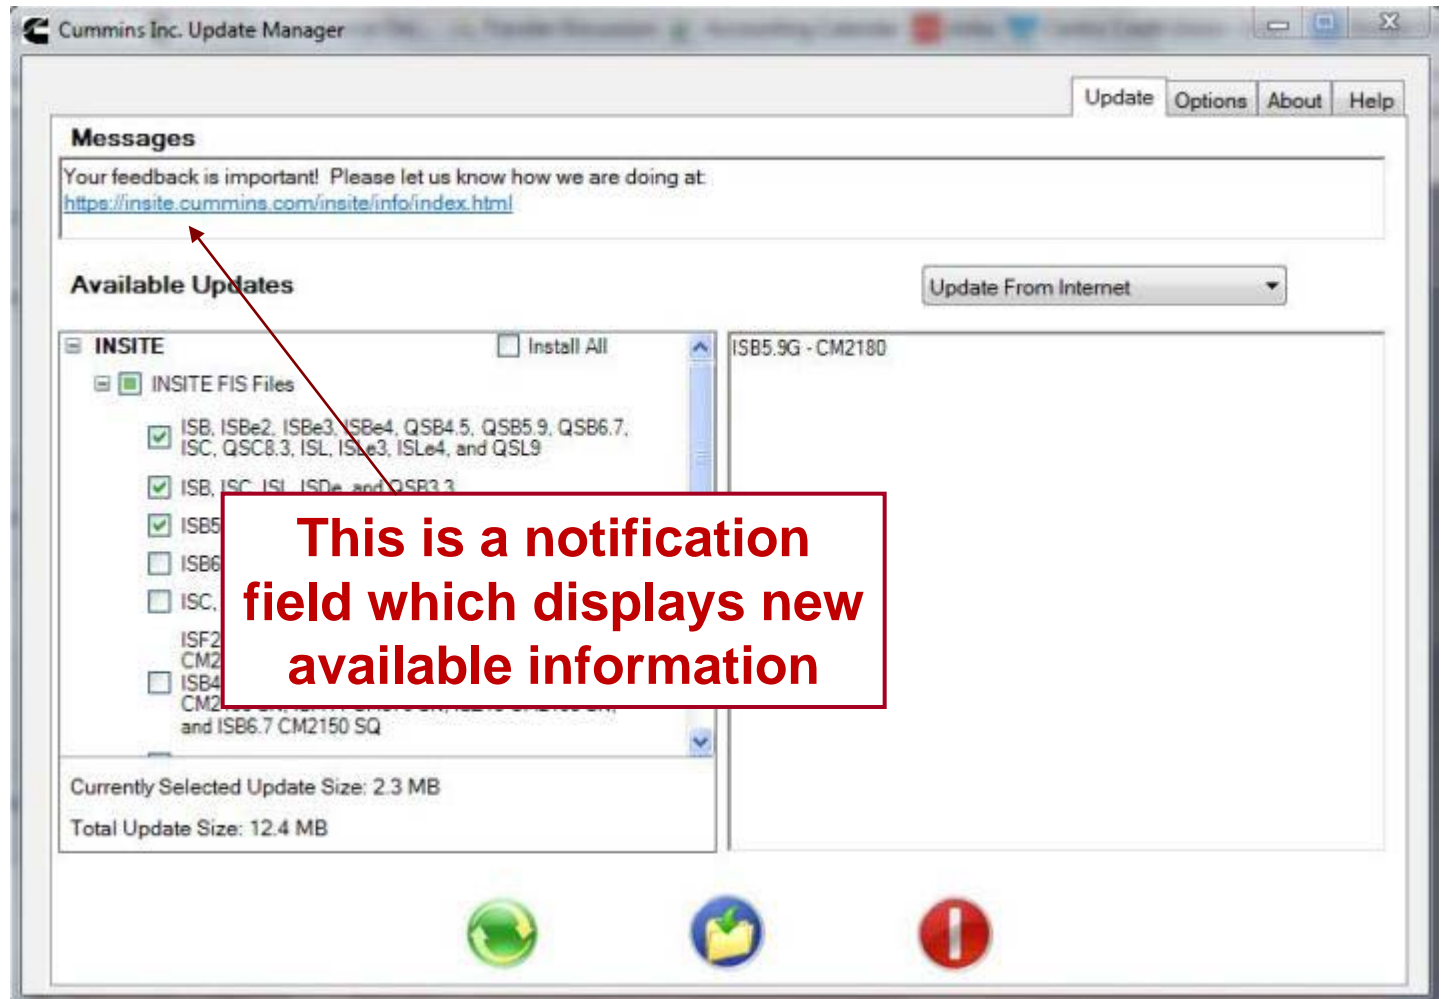

Check for Updates Manually

- Updates can be manually checked through the following:
 - INSITE > Help > Check for Updates
 - Open the Cummins Inc Update Manager and click on “Get Updates” button in the lower left part of the window.

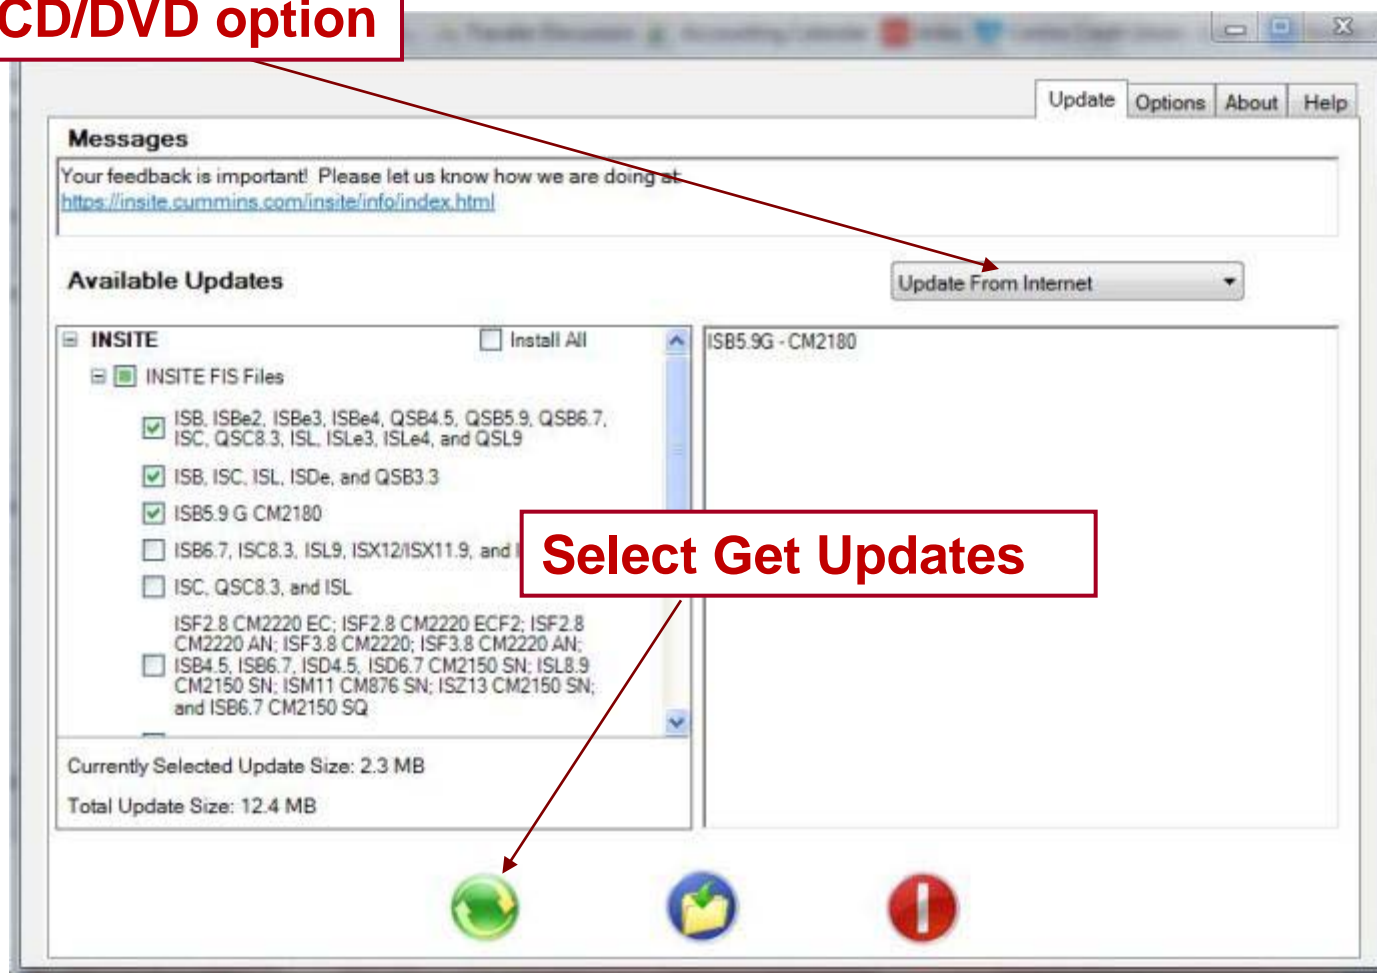

Message Box

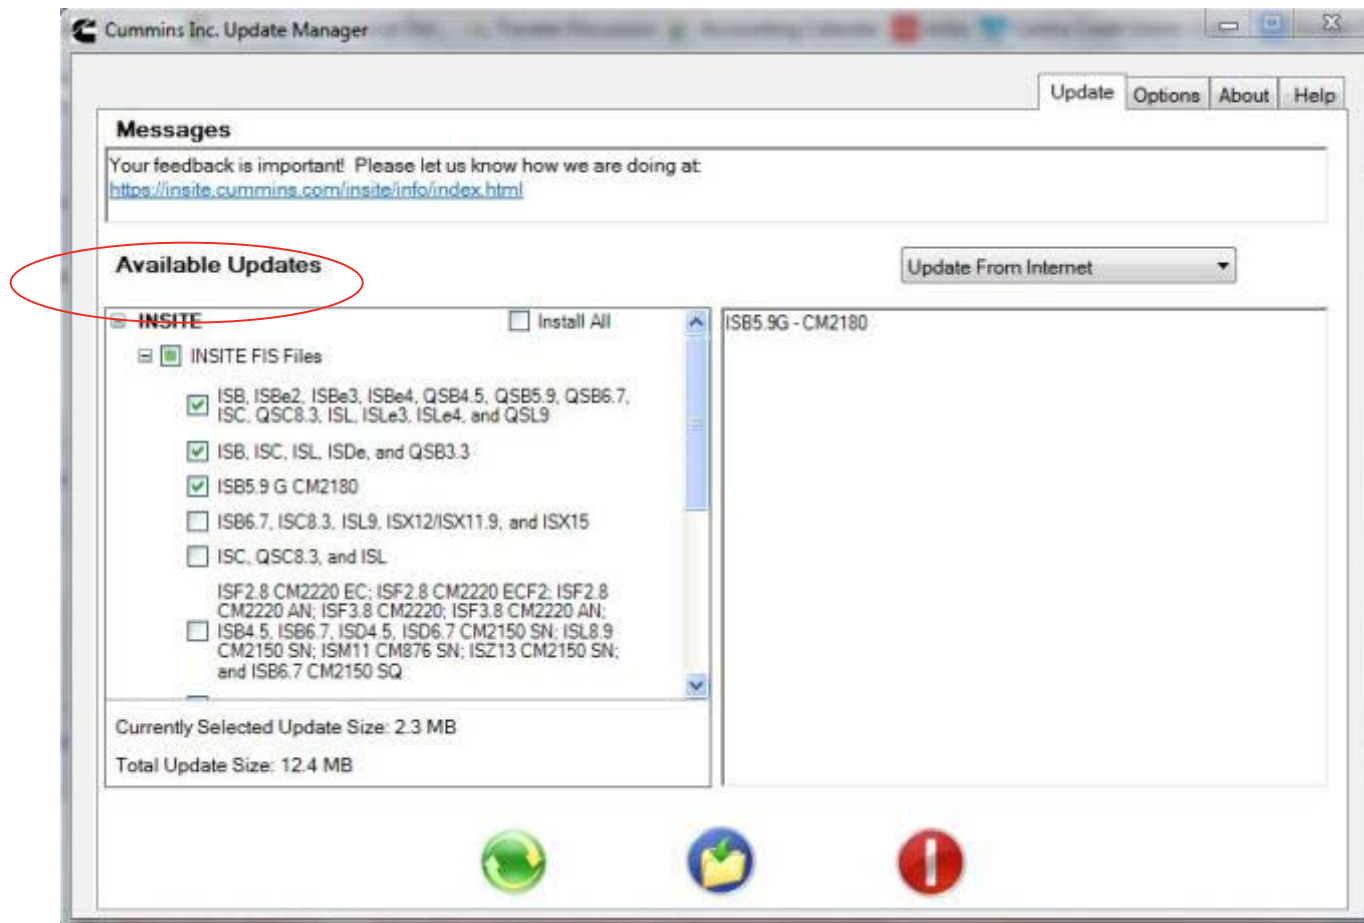

Get Updates From Internet/CD

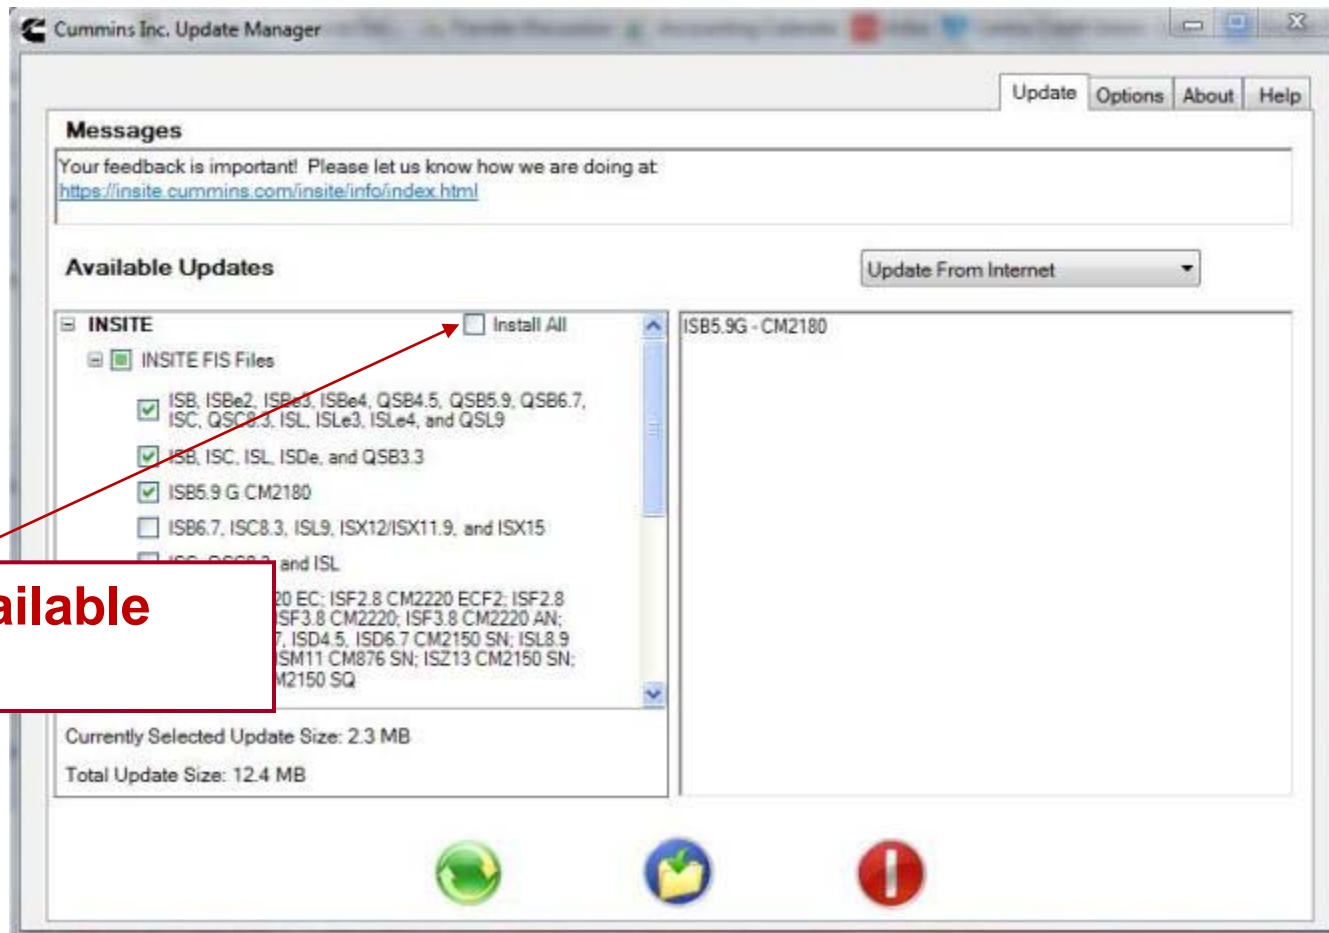

Choose Update from Internet, Update from Other, or CD/DVD option

Checking for Updates - Internet

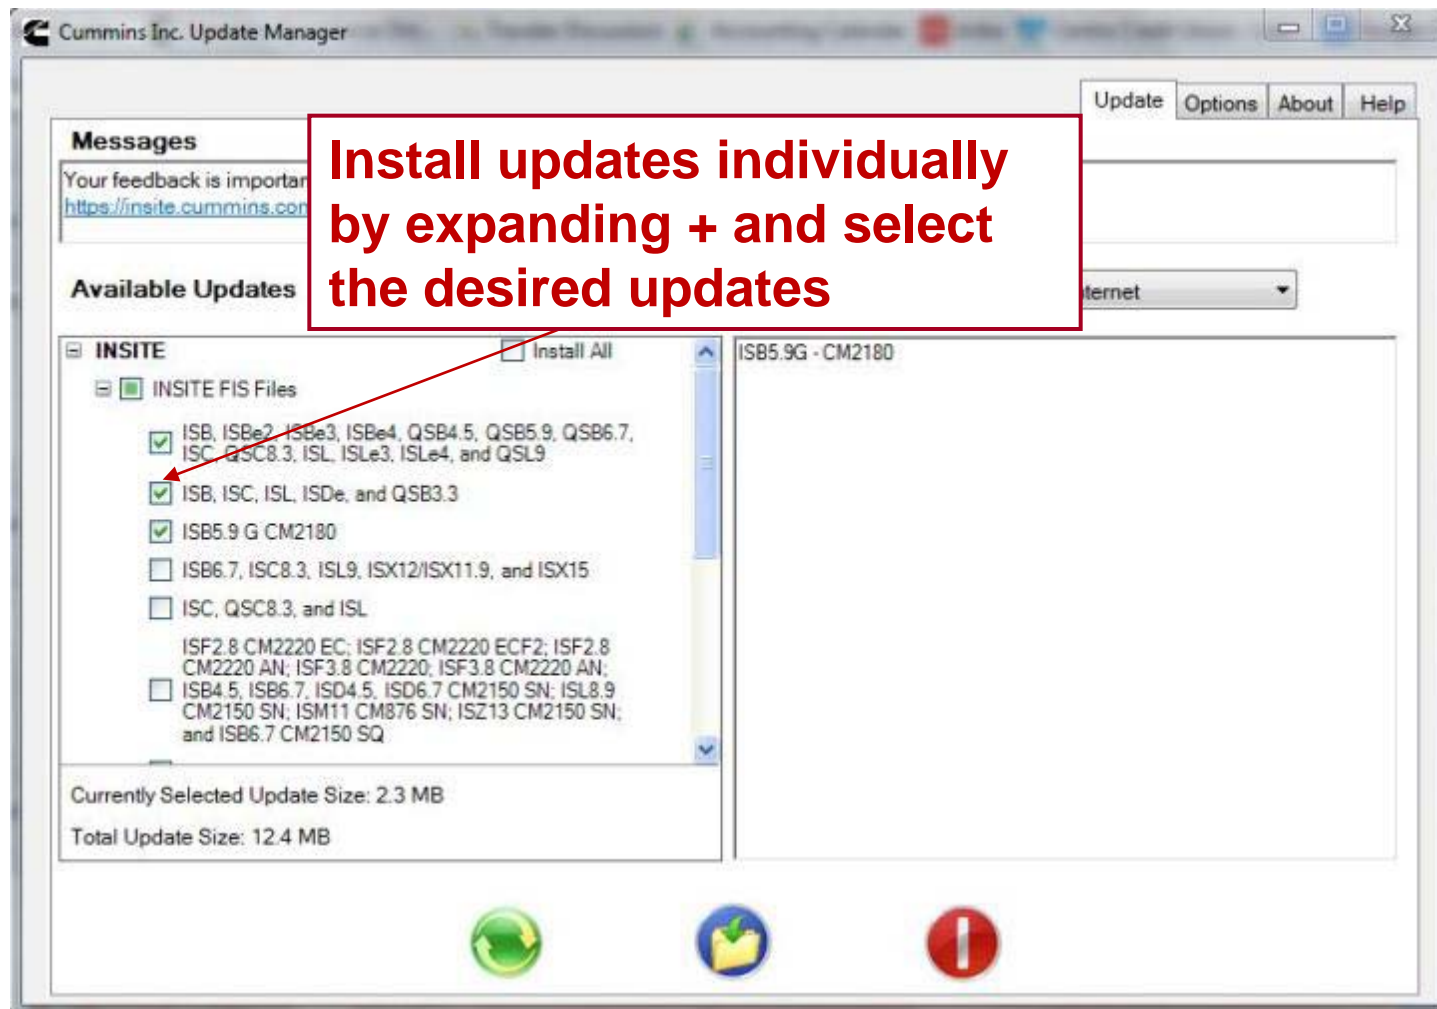

Available Updates – Install All INSITE Updates

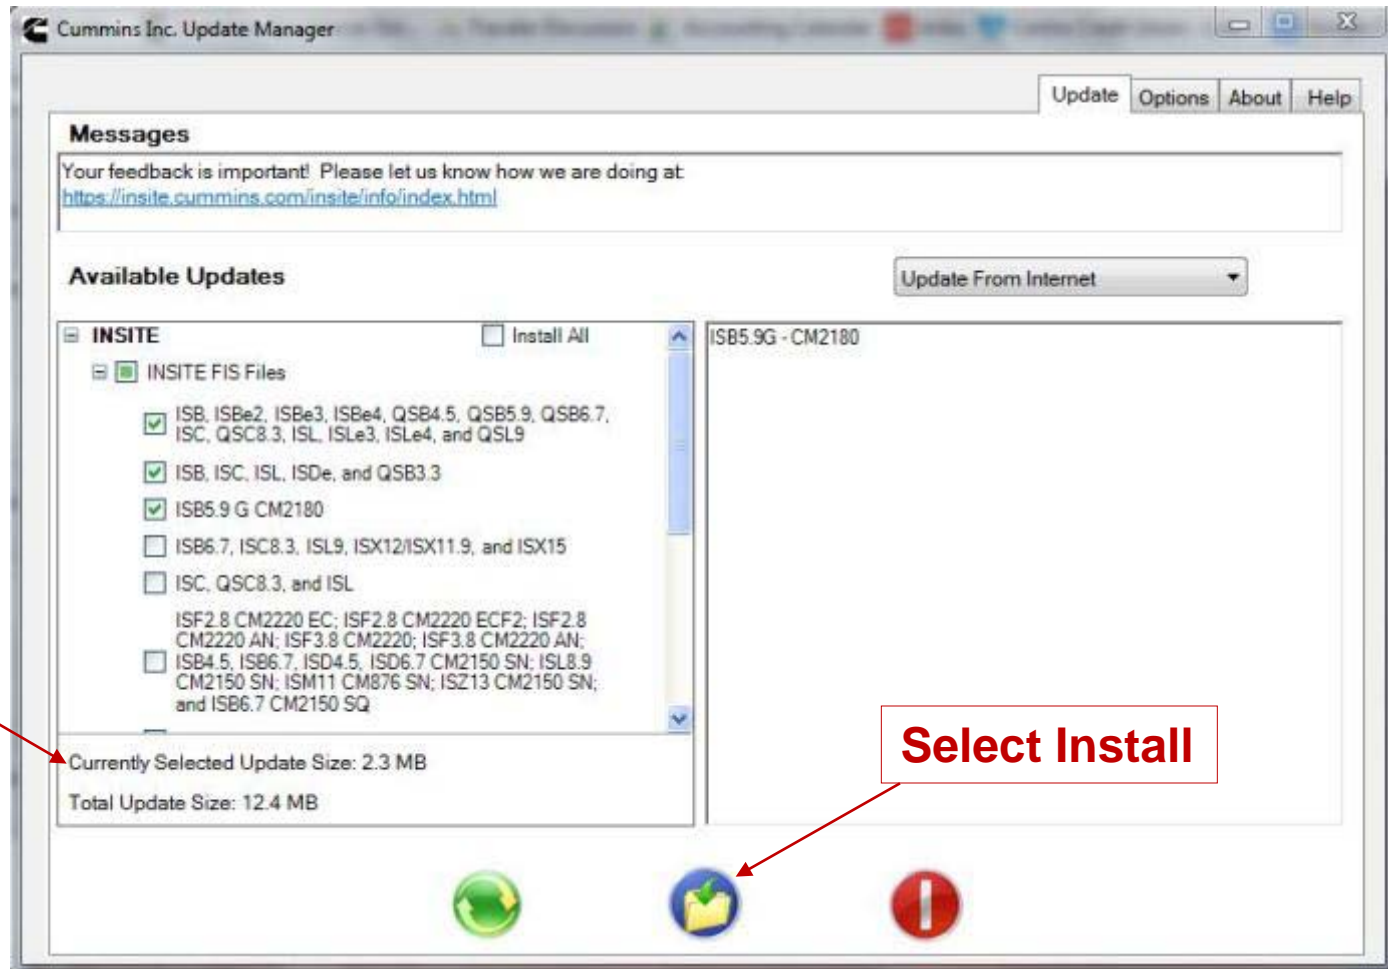

Install All available updates

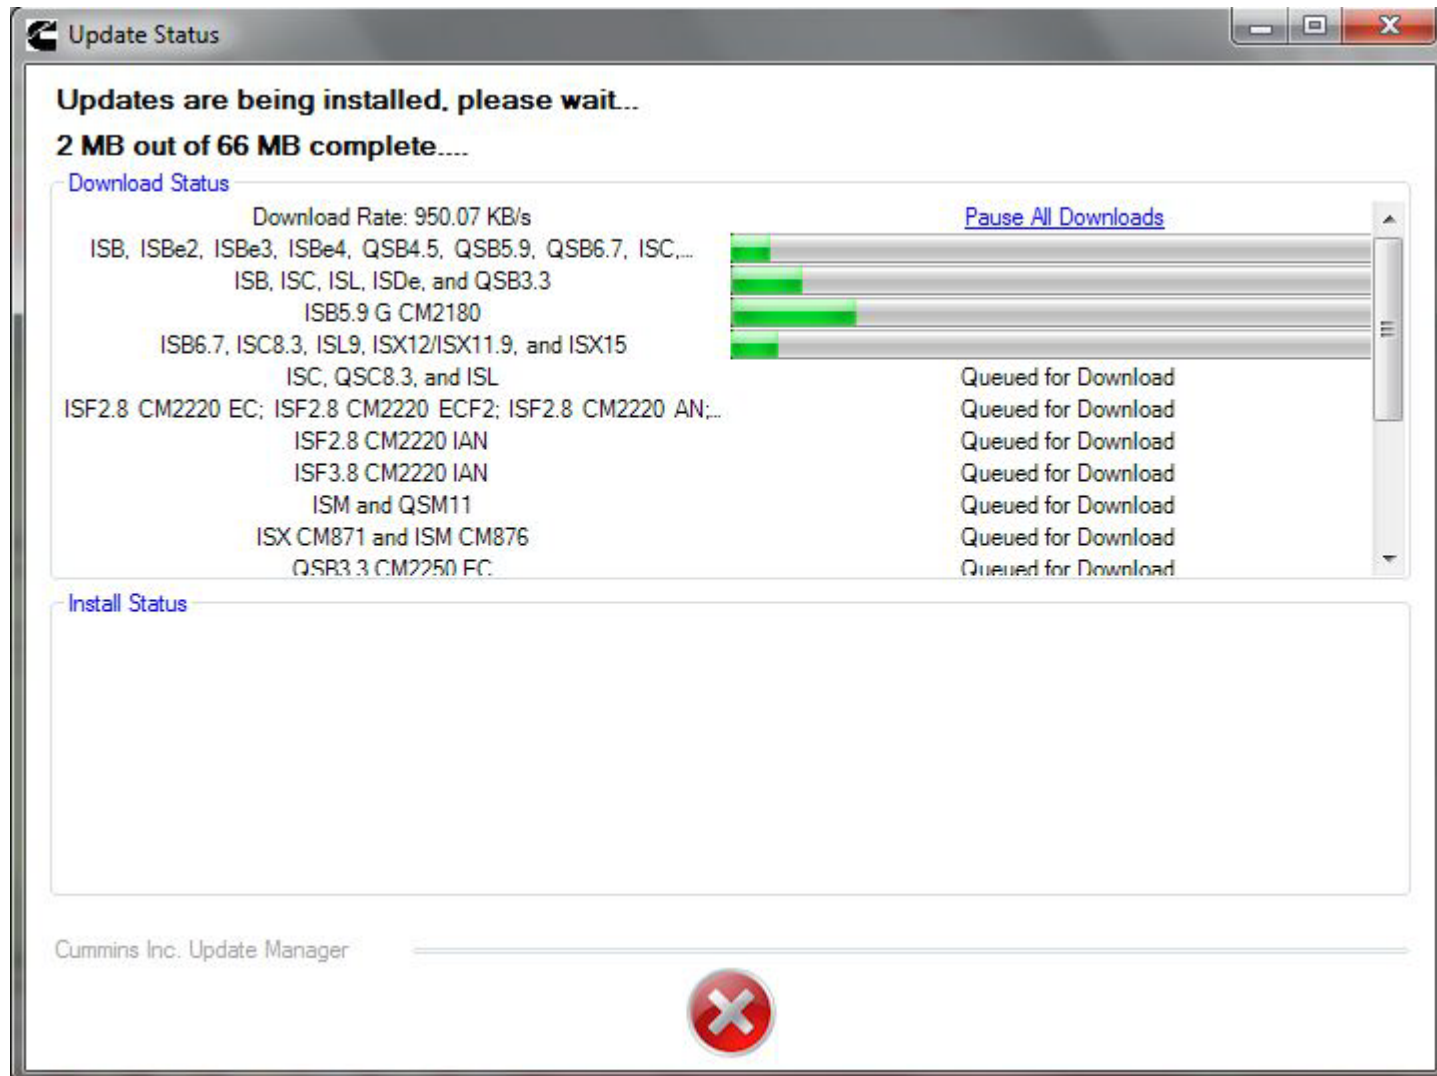

Available Updates Expanded

Select Available Updates

Download Status Information

Installation Status Information

Once the installation is complete, the installation status will be displayed.

If the installation is successful, “Installation Successful” will be displayed.

If the installation is not successful, “Installation Failed: Error XX” will be displayed along with an error code.

Options Tab – Proxy Settings

Most users will not have to change the proxy settings.

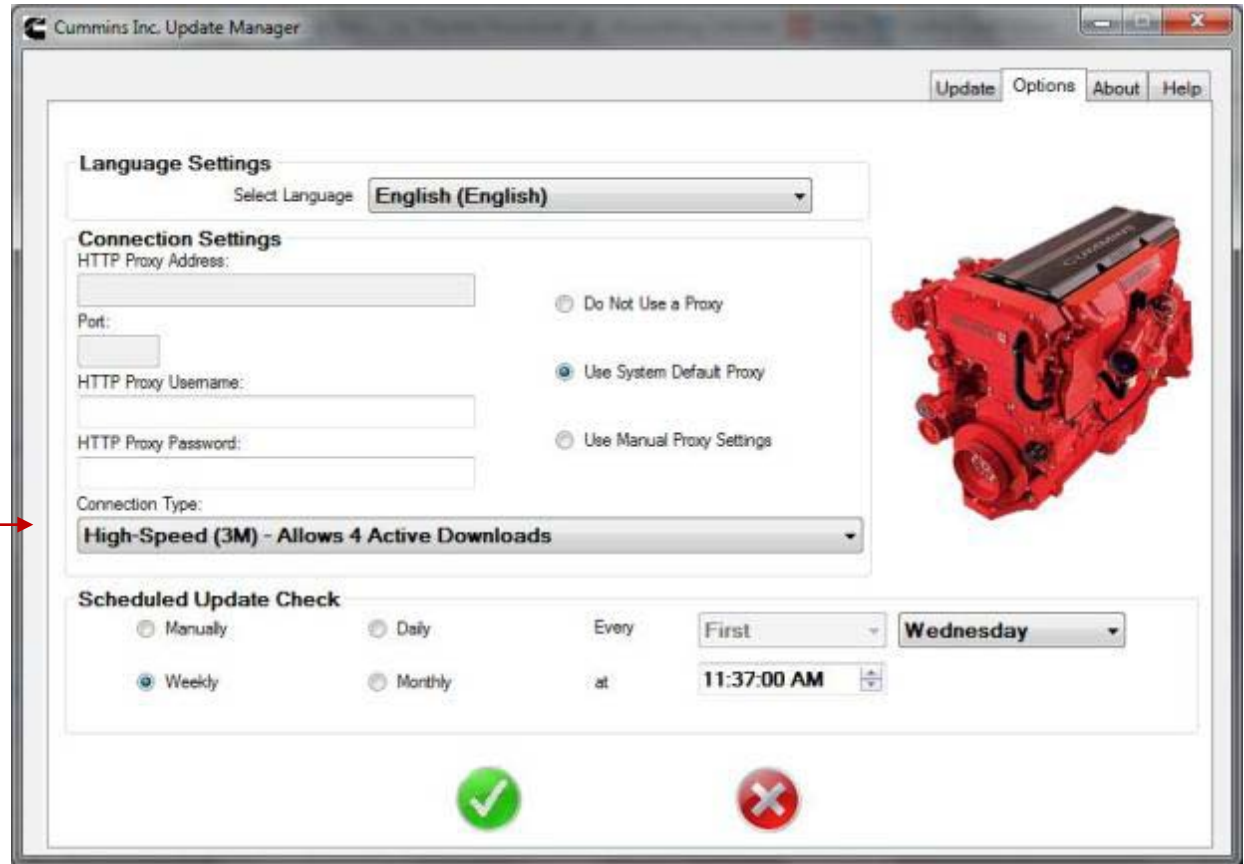

For other users, the Proxy Settings will have to be entered.

Contact local IT support for help with Proxy settings.

Options Tab – Connection Types

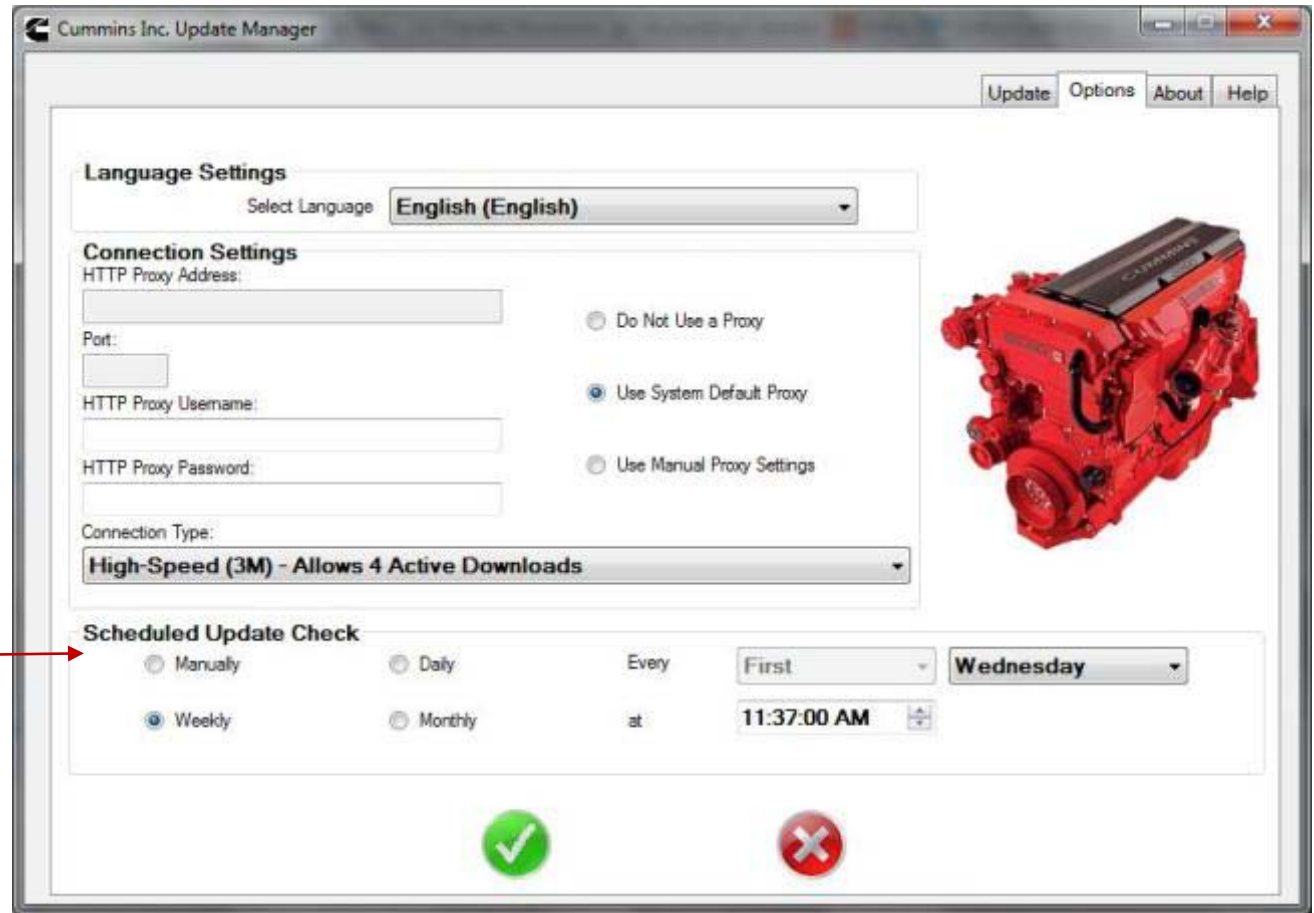

New to 3.0 - Connection Type has been added for users who want to vary their connection option.

Options Tab – Scheduled Update Check

The default Scheduled Update Check is once a month.

This can be changed to Daily, Weekly, Monthly or Manually.

The screenshot shows the 'Cummins Inc. Update Manager' window with the 'Options' tab selected. The window has a title bar with standard OS controls and a menu bar with 'Update', 'Options', 'About', and 'Help'. The main content area is divided into three sections: 'Language Settings', 'Connection Settings', and 'Scheduled Update Check'. The 'Language Settings' section has a 'Select Language' dropdown menu set to 'English (English)'. The 'Connection Settings' section includes fields for 'HTTP Proxy Address', 'Port', 'HTTP Proxy Username', and 'HTTP Proxy Password', along with radio buttons for 'Do Not Use a Proxy', 'Use System Default Proxy' (which is selected), and 'Use Manual Proxy Settings'. A 'Connection Type' dropdown is set to 'High-Speed (3M) - Allows 4 Active Downloads'. The 'Scheduled Update Check' section features radio buttons for 'Manually', 'Daily', 'Weekly' (which is selected), and 'Monthly'. It also includes a frequency dropdown set to 'First', a day dropdown set to 'Wednesday', and a time field set to '11:37:00 AM'. At the bottom of the window are two large circular buttons: a green one with a white checkmark and a red one with a white 'X'.

Help Tab

The Help Tab provides an overview of the Update Manager

The Cummins® INSITE™ Update Manager provides a means of delivering software, Fault Information System (FIS), Help File, and User Manual updates. Updates can be downloaded either from a Cummins® CD or over the internet. Using Update Manager is an easy way to keep the INSITE™ electronic service tool and its supporting data as current as possible.

Update Manager can be opened manually at any time or it can be configured to issue a reminder at regular intervals.

Note: Files cannot be updated while INSITE™ is running. Ensure INSITE™ is closed before installing updates.

Perform the following steps to obtain INSITE™ updates:

1. Open Cummins® INSITE™ Update Manager by performing one of the following steps:
 - Within INSITE™, select **Help > Check for Updates**
 - From the Windows Start menu, select **All Programs > INTELECT > Cummins® INSITE™ Update Manager**
 - When the Update Manager reminder window opens, click on the **Select and Install Updates** link.
2. Select either **Update From Internet** or **Update From CD**, from the drop-down menu at the top of the screen.
3. Select the **Get Updates** button.
4. Update Manager will check for updates. This process may take several minutes. A rotating globe will appear in the upper right-hand corner of the screen.
 - If updating from the Internet, Update Manager will connect to a Cummins® web server and compare the INSITE™ version and files on the PC to the files on the web server.
 - If updating from a CD, Update Manager will compare the INSITE™ version and files on the PC to the files on the CD.
5. If updates are available, they will be listed in the window pane under **Available Updates**.
6. Select the desired updates by either highlighting the item or clicking on its checkbox. When an item is selected, its description is displayed on the right-hand side of the screen. The size of the currently selected item and the total size of all selected items is displayed below the Available Updates. Click on the item again to deselect it.

Selecting the top level box will also select all updates listed below it. Clicking on the <plus-sign.gif> will expand the listing.

Cummins® Inc. Update Manager Wrap Up

- Provides up-to-date Fault Information System (FIS) files, Help files, Feature Packs and Service Packs
- Automatic Update Notification
- Scheduled update checks
